Langslow, 2000-06-08 Despite the ubiquitous importance of medicine in Roman literature philosophy and social history the language of Latin medical texts has not been properly studied This book presents the first systematic account of a part of this large rich field Concentrating on texts of high medicine written in educated even literary Latin Professor Langslow offers a detailed linguistic profile of the medical terminology of Celsus and Scribonius Largus first century AD and Theodorus Priscianus and Cassius Felix fifth century AD with frequent comparisons with their respective near contemporaries The linguistic focus is on vocabulary and word formation and the book thus addresses the large question of the possible and the preferred means of extending the vocabulary in Latin at the beginning and end of the Empire Some syntactic issues including word order and nominalization are also discussed and sections on the sociolinguistic background and stylistic features consider the question to what extent we may speak of medical Latin in the strong sense as the language of a group and draw comparisons and contrasts between ancient and modern technical languages

The Harvard Medical School v. 3 Thomas Francis Harrington, 1905

Aspects of the Language of Latin Poetry Roland Mayer, James Noel Adams, 1999 Of the peoples of ancient Italy only the Romans committed newly composed poems to writing and for about 250 years Latin speakers developed an impressive verse literature The language had traditional resources of high style e g alliteration lexical and morphological archaism or grecism and of course metaphor and word order and there were also less obvious resources in the technical vocabularies of law philosophy and medicine The essays in this volume show how the poets in the classical period combined these elements and so created a poetic medium that could comprehend satire invective erotic elegy drama lyric and the grandest heroic epics These wide ranging studies will be essential reading for all students of Latin
