**Complacent Class** Tyler Cowen, 2017-02-28 A Wall Street Journal and Washington Post Bestseller Tyler Cowen's blog Marginal Revolution is the first thing I read every morning And his brilliant new book The Complacent Class has been on my nightstand after I devoured it in one sitting I am at round the clock Cowen saturation right now Malcolm Gladwell Since Alexis de Tocqueville restlessness has been accepted as a signature American trait Our willingness to move take risks and adapt to change have produced a dynamic economy and a tradition of innovation from Ben Franklin to Steve Jobs The problem according to legendary blogger economist and best selling author Tyler Cowen is that Americans today have broken from this tradition we're working harder than ever to avoid change We're moving residences less marrying people more like ourselves and choosing our music and our mates based on algorithms that wall us off from anything that might be too new or too different Match.com matches us in love Spotify and Pandora match us in music Facebook matches us to just about everything else Of course this matching culture brings tremendous positives music we like partners who make us happy neighbors who want the same things We're more comfortable But according to Cowen there are significant collateral downsides attending this comfort among them heightened inequality and segregation and decreased incentives to innovate and create The Complacent Class argues that this cannot go on forever We are postponing change due to our near sightedness and extreme desire for comfort but ultimately this will make change when it comes harder The forces unleashed by the Great Stagnation will eventually lead to a major fiscal and budgetary crisis impossibly expensive rentals for our most

attractive cities worsening of residential segregation and a decline in our work ethic The only way to avoid this difficult future is for Americans to force themselves out of their comfortable slumber to embrace their restless tradition again

Ballantine, Keith A. Roberts, Kathleen Odell Korgen, 2018-11-29 Our Social World Introduction to Sociology inspires students to develop their sociological imaginations to see the world and personal events from a new perspective and to confront sociological issues on a day to day basis Organized around the Social World model a conceptual framework that demonstrates the relationships among individuals the micro level organizations institutions and subcultures the meso level and societies and global structures the macro level Jeanne H Ballantine Keith A Roberts and Kathleen Odell Korgen use this framework to help students develop the practice of using three levels of analysis and to view sociology as an integrated whole rather than a set of discrete subjects The Seventh Edition includes new coverage of climate change the influence of robots and artificial intelligence on workers race relations in the Trump era issues related to transgender identity and gender fluidity sexual harassment in the workplace and the MeToo movement declining marriage rates the impact of tracking for students at all academic achievement levels smoking as an example of health and inequality in the US gun violence and the student movement to control access to guns social media and Russian interference in the 2016 election      *Curated Stories* Sujatha Fernandes, 2017-08-10 Storytelling has proliferated today from TED Talks and Humans of New York to a plethora of story coaching agencies and consultants Heartbreaking accounts of poverty mistreatment and struggle may move us deeply But what do they move us to do And what are the stakes in the crafting and use of storytelling In Curated Stories Sujatha Fernandes considers the rise of storytelling alongside the broader shift to neoliberal free market economies She argues that stories have been reconfigured to promote entrepreneurial self making and restructured as easily digestible soundbites mobilized toward utilitarian ends Fernandes roams the globe and returns with stories from the Afghan Women s Writing Project the domestic workers movement and the undocumented student Dreamer movement in the United States and the Misi n Cultura project in Venezuela She shows how the conditions under which certain stories are told the tropes through which they are narrated and the ways in which they are responded to may actually disguise the deeper contexts of global inequality Curated stories shift the focus away from structural problems and defuse the confrontational politics of social movements Not just a critical examination of the contemporary use of narrative and its wider impact on our collective understanding of pressing social issues Curated Stories also explores how storytelling might be reclaimed to allow for the complexity of experience to be expressed in pursuit of transformative social change      Class Dynamics of Development

Jonathan Pattenden, Liam Campling, Satoshi Miyamura, Benjamin Selwyn, 2018-12-07 This book argues that class relations are constitutive of development processes and central to understanding inequality within and between countries. It does so via a transdisciplinary approach that draws on case studies from Asia, Latin America and sub-Saharan Africa. Contributors illustrate and explain the diversity of forms of class relations and the ways in which they interplay with other social relations of dominance and subordination such as gender and ethnicity as part of a wider project to revitalise class analysis in the study of development problems and experiences. Class is conceived as arising out of exploitative social relations of production but is formulated through and expressed by multiple determinations. By illuminating the diversity of social formations, this book illustrates the depth and complexity present in Marx's method. This book was originally published as a special issue of *Third World Quarterly*.

**The Postcolonial Age of Migration** Ranabir Samaddar, 2020-05-11 This book critically examines the question of migration that appears at the intersection of global neo-liberal transformation, postcolonial politics and economy. It analyses the specific ways in which colonial relations are produced and reproduced in global migratory flows and their consequences for labour, human rights and social justice. The postcolonial age of migration not only indicates a geopolitical and geo-economic division of the globe between countries of the North and those of the South, marked by massive and mixed population flows from the latter to the former, but also the production of these relations within and among the countries of the North. The book discusses issues such as transborder flows among countries of the South, migratory movements of the internally displaced, growing statelessness leading to forced migration, border violence, refugees of partitions, customary and local practices of care and protection, population policies and migration management, both emigration and immigration, the protracted nature of displacement, labour flows and immigrant labour, and the relationships between globalisation, nationalism, citizenship and migration in postcolonial regions. It also traces colonial and postcolonial histories of migration and justice to bear on the present understanding of local experiences of migration as well as global social transformations, while highlighting the limits of the fundamental tenets of humanitarianism, protection, assistance, security, responsibility, which impact the political and economic rights of vast sections of moving populations. Topical and an important intervention in contemporary global migration and refugee studies, the book offers new sources, interpretations and analyses in understanding postcolonial migration. It will be useful to scholars and researchers of migration studies, refugee studies, border studies, political studies, political sociology, international relations, human rights and law, human geography, international politics and political economy. It will also interest policymakers, legal practitioners, nongovernmental organisations and activists.

**Globalization and Labour in the Twenty-First Century** Verity Burgmann, 2016-04-14 The Open Access version of this book available at <http://www.tandfebooks.com> has been made available under a Creative Commons Attribution Non-Commercial No Derivatives 3.0 license. Globalization has adversely affected working class organization and mobilization, increasing inequality by redistribution upwards from labour to capital. However, workers around the world are challenging

their increased exploitation by globalizing corporations In developed countries many unions are transforming themselves to confront employer power in ways more appropriate to contemporary circumstances in developing countries militant new labour movements are emerging Drawing upon insights in anti determinist Marxian perspectives Verity Burgmann shows how working class resistance is not futile as protagonists of globalization often claim She identifies eight characteristics of globalization harmful to workers and describes and analyses how they have responded collectively to these problems since 1990 and especially this century With case studies from around the world including Greece since 2008 she pays particular attention to new types of labour movement organization and mobilization that are not simply defensive reactions but are offensive and innovative responses that compel corporations or political institutions to change Aging and less agile manifestations of the labour movement decline while new expressions of working class organization and mobilization arise to better battle with corporate globalization This book will be of interest to students and scholars of labour studies globalization political economy Marxism and sociology of work
