The Handbook of Insurance-Linked Securities

Pauline Barrieu, Luca Albertini, 2010-06-15 Luca Albertini and Pauline Barrieu are to be congratulated on this volume. Written in a period where structured projects in finance are having a difficult time, it is worthwhile to return to the cradle of securitisation insurance. Spread out over three parts: life, non-life, and tax and regulatory issues, the 26 chapters written mainly by practitioners give an excellent overview of this challenging field of modern insurance. Methodology and examples are nicely go hand in hand. The overall slant is towards actual analyses of concrete products. No doubt this book will become a milestone going forward for actuarial students, researchers, regulators, and practitioners alike. Paul Embrechts, Professor of Mathematics and Director of RiskLab, ETH Zurich. The convergence of insurance with the capital markets has opened up an alternative channel for insurers to transfer risk, raise capital, and optimize their regulatory reserves, as well as offering institutions a source of relatively liquid investment with limited correlation with other exposures. One of the financial instruments allowing for the cession of insurance-related risks to the capital markets is Insurance Linked Securities (ILS). This book provides hands-on information essential for market participants, drawing on the insights and expertise of an impressive team of international market players representing the various aspects and perspectives of this growing sector. The book presents the state of the art in Insurance Linked Securitization by exploring the various roles for the different parties involved in the transactions, the motivation for the transaction, sponsors, the potential inherent pitfalls, the latest developments, and transaction structures, and the key challenges faced by the market. The book is organized into parts, each covering a specific topic or sector of the market. After a general overview of the ILS market, the Insurance Linked Securitization process is studied in detail. A distinction is made between non-life and life securitization due to the specificities of each sector. The process and all the actors involved are identified and considered in a comprehensive and systematic way. The concepts are first looked at in a general way before the analysis of relevant case studies where the ILS technology is applied. Particular focus is given to the key stages in both non-life and life securitizations, including the general features of the transactions, the cedant's perspectives, the legal issues, the rating methodologies, the choice of an appropriate trigger, and the risk modeling, the particular challenges related to longevity securitization, the investor's perspective, and the question of the management of a portfolio of ILS. The general issues related to insurance linked securitization, such as accounting and tax issues, regulatory issues, and solvency capital requirements. The book is accompanied by a website www.wiley.com/go/albertini_barrieu_ILS which will feature updates and additions to the various contributions to follow market developments.

ambitions can be realized and new experiences enjoyed yet with so much to consider people are often unsure how best to plan for their future The scope for concern and confusion is even greater with the uncertain economic and political climate changing retirement ages the pressures of an ageing population and evolving pension rules Making the most out of retirement by changing to a new career or starting your own business only adds to the plethora of retirement options The Good Retirement Guide 2020 is an indispensable book that you will refer to again and again offering clear and concise suggestions on a broad range of subjects for pre retirement planning in the UK Including information on finance investments pensions annuities and drawdown benefits and tax housing health holidays starting a business and looking after elderly parents this book will help you to save more live better and be happier Landmark Cases in Revenue Law John Snape, Dominic de Cogan, 2019-01-10 In an important addition to the series this book tells the story of 20 leading revenue law cases It goes well beyond technical analysis to explore questions of philosophical depth historical context and constitutional significance The editors have assembled a stellar team of tax scholars including historians as well as lawyers practitioners as well as academics to provide a wide range of fresh perspectives on familiar and unfamiliar decisions The whole collection is prefaced by the editors extended introduction on the peculiar significance of case law in revenue matters This publication is a thought provoking and engaging showcase of tax writing that is accessible equally to specialists and non specialists *Tax Authority Advice and the Public* Stephen Daly, 2020-04-02 There is now almost universal acceptance that tax law is overly complex and indeterminate and yet there has to date been no comprehensive assessment of the role of the tax authority in the current arrangement If the legislation and case law offer few immediate answers to the taxpayer then the role of Her Majesty s Revenue Customs HMRC in advising taxpayers becomes more apparent This monograph contends that the provision of advice by HMRC is desirable by virtue of the rule of law and it follows that any such advice should be correct clear accessible and reliable Additionally there should exist some means of scrutinising the advice in order to check that it satisfies these criteria *Tax Authority Advice and the Public* explores this view of HMRC s role in tax collection It explains the deficiencies in the current system in this light highlighting the pitfalls for taxpayers and practitioners as well as the potential remedies Finally the book assesses potential reforms which could be adopted in order to alleviate existing problems A timely and ambitious work this book is essential reading for practitioners and academics interested in the interaction between tax administration and public law **Tax Avoidance** Great Britain: Parliament: House of Commons: Committee of Public Accounts, 2013-02-19 HMRC estimates that in 2010 11 the tax gap due to avoidance was 5 billion and that the present total tax at risk from avoidance over time is 10 2 billion There is a proliferation of contrived schemes which exploit loopholes in legislation and abuse available tax relief schemes Promoters are deliberately taking advantage of the time lag between the launch of a scheme and the closure of the scheme by HMRC Promoters and providers sign up as many clients as possible before HMRC changes the law and shuts the scheme They then move on to a new scheme and repeat the process The

complexity of tax law creates opportunities for avoidance there is no effective deterrent and HMRC is ineffective in challenging promoters All too often Government introduces tax incentives to stimulate economic activity that become an opportunity for tax avoidance Promoters collect their fees even when the schemes are found not to deliver a tax advantage and few schemes are covered by misleading regulations Those who promote a tax avoidance scheme are required to notify HMRC of the scheme however HMRC does not know how much avoidance is not disclosed but should It is alarming that some QCs opinions are being used by promoters as a reasonable excuse for non disclosure which prevents HMRC from applying a penalty HMRC could learn from how other countries deter and tackle tax avoidance HMRC should also name and shame those who promote tax avoidance schemes to harness public opinion and reduce the appetite of companies to promote or use avoidance schemes
