GROUNDING INSTRUCTIONS

This appliance is designed to be used with a 3-prong electrical plug and a 3-prong electrical outlet. Grounding is required for safety. To ensure the plug is properly grounded, check the plug and the outlet. The plug is equipped with a cord having an equipment-grounding conductor (EG) and a grounding plug (GP). The plug must be inserted into an appropriate outlet (EO) that is properly installed and grounded in accordance with all local codes and ordinances.

WARNING:

Improper connection of the equipment-grounding conductor can result in the risk of electric shock. Check with a qualified electrician or service person if you are in doubt as to whether the outlet is properly grounded. Do not modify the plug provided with the appliance - if it will not fit the outlet, have a proper outlet installed by a qualified electrician.

This appliance is for use on a normal 120-volt circuit and has a grounding plug that looks like the plug in the picture Fig. 1. A temporary adapter (TA) may be used to connect this plug to a 2-prong receptacle (R) if a properly grounded outlet is not available (Fig. 2). The temporary adapter should be used only until a properly grounded outlet (EO) can be installed or a qualified electrician (Fig. 3). The green colored plug on the side of the plug (P) extending from the adapter must be connected to a permanently grounded (EG) outlet in a properly grounded outlet box cover (Fig. 4). Whenever the adapter is used, it must be held in place by a metal screw (MS) in the outlet. In Canada, the use of a temporary adapter is not permitted by the Canadian Electrical Code.
