Lorenz, 2022-07-28 This study of Joseph Conrad s influential work *Heart of Darkness* presents for the first time the German language reception of this reference text in the debate on postcolonialism The spectrum ranges from Conrad s contemporaries like Kafka to many canonical authors of the 20th century including Thomas Mann Ernst J nger Christa Wolf to the most recent names in literature i e Christian Kracht und Lukas B rfuss Beyond the readings of their works the study contributes to the study of cultural transfers as well as to Conrad philology and it expands the theory of intertextuality with parameters that capture the complex factor of power in postcolonial relations ***The Perilous Light*** Eva Gore-Booth, 1915 *Arcana Coelestia: Genesis* Emanuel Swedenborg, 1838 *Heavenly Arcana which are in the Sacred Scripture Or Word of the Lord, Laid Open, Together with Wonderful Things which Were Seen in the World of Spirits and in the Heaven of Angels* Emanuel Swedenborg, 1838 ***Dark Nights, Bright Lights*** Susanne Bach, Folkert Degenring, 2015-10-16 Light and darkness shape our perception of the world This is true in a literal sense but also metaphorically in theology philosophy literature and the arts the light of day signifies life safety knowledge and all that is good while the darkness of the night suggests death danger ignorance and evil A closer inspection however reveals that things are not quite so clear cut and that light and darkness cannot be understood as simple binary opposites On a biological level for example daylight and darkness are inseparable factors in the calibration of our circadian rhythms and a lack of periodical darkness appears to be as contrary to health as a lack of exposure to sunlight On a cultural level too night and darkness are far from being universally

condemnable in fiction drama and poetry the darkness of the night allows not only nightmares but also dreams it allows criminals to ply their trade and allows lovers to meet it allows the pursuit of pleasure as well as deep thought it allows metamorphoses transformations and transgressions unthinkable in the light of day But night is not merely darkness The night gains significance as an alternative space as an other of the day only when it is at least partially illuminated The volume examines the interconnection of night darkness and nocturnal illumination across a broad range of literary texts The individual essays examine historically specific light conditions in literature tracing the symbolic and metaphoric content of darkness and illumination and the attitudes towards them **Through Night to Light** Friedrich Spielhagen,1878

Lighting and shadows are used within a range of art forms to create aesthetic effects Piotr Sadowski s study of light and shadow in Weimar cinema and contemporaneous visual arts is underpinned by the evolutionary semiotic theories of indexicality and iconicity These theories explain the unique communicative and emotive power of light and shadow when used in contemporary indexical media including the shadow theatre silhouette portraits camera obscura photography and film In particular Sadowski highlights the aesthetic and emotional significance of shadows The cast shadow as an indexical sign maintains a physical connection with its near present referent such as a hidden person stimulating a viewer s imagination and provoking responses including anxiety or curiosity The cinematic shadow plays a stylistic role by enhancing image texture depth of field and tonal contrast of cinematic moments Such enhancements are especially important in monochromatic films and Sadowski interweaves the book with accounts of seminal Weimar cinema moments Sadowski s book is distinctive for combining historical materials and theoretical approaches to develop a deeper understanding of Weimar cinema and other contemporary art forms *The Semiotics of Light and Shadows* is an ideal resource for both scholars and students working in linguistics semiotics film media and visual arts
