Fix My Shoulder George Demirakos, 2014-10-16 The shoulder is the most mobile joint in the body It enjoys an amazing range of motion it can rotate 360 degrees and can extend upward sideways across the body outward inward every which way That makes it the most useful joint we have and not surprisingly we use it the most Lifting pushing pulling throwing catching hugging the shoulder experiences more motion than any other joint So it is perhaps not surprising that sooner or later it becomes overtaxed fatigued After all as with anything if you keep applying the same pressure over and over the strength and stability of the structure being pressured will wear down That's what happens to the shoulder and when it does it's not only painful it can also stop you in your tracks limiting your ability to do even simple things you're used to doing The truth is that if you've never felt any kind of shoulder pain whatsoever the chances are good that as you grow older you will Our bodies tend to lose muscle and bone mass as we age and we become more susceptible to the aches and pains that may result But neither the weakness nor the pain is inevitable The shoulder can be fixed and the pain can go away First there's a fix that cures the weakness and ends the pain But there are also things you can do to prevent injury or strain in the first place so that you never have to lose the strength stability and range of motion of the shoulder at all *Fix My Shoulder* explores the anatomy and function of the shoulder methods of preventing pain and injury and treatments for healing that anyone can implement for better shoulder health and function
