General Principles of Law and International Due Process Charles T. Kotuby, Luke A. Sobota, 2017 Article 38 of the Statute of the International Court of Justice defines international law to include not only custom and convention between States but also the general principles of law recognized by civilized nations within their municipal legal systems In 1953 Bin Cheng wrote his seminal book on general principles identifying core legal principles common to various domestic legal systems across the globe This monograph summarizes and analyzes the general principles of law and norms of international due process with a particular focus on developments since Cheng's writing The aim is to collect and distill these principles and norms in a single volume as a practical resource for international law jurists advocates and scholars The information contained in this book holds considerable importance given the growth of inter state intercourse resulting in the increased use of general principles over the past 60 years General principles can serve as rules of decision whether in interpreting a treaty or contract determining causation or ascertaining unjust enrichment They also include a core set of procedural requirements that should be followed in any adjudicative system such as the right to impartiality and the prohibition on fraud Although the general principles are by definition basic and even rudimentary they hold vital importance for the rule of law in international relations They are meant not to define a rule of law but rather the rule of law

Tort Liability for Human Rights Abuses George P Fletcher,2008-10-03 Advancing a bold theory of the relevance of tort law in the fight against human rights abuses celebrated US law professor George Fletcher here challenges the community of international lawyers to think again about how they can use the Alien Tort Statute Beginning with an historical analysis Fletcher shows how tort and criminal law originally evolved to deal with similar problems how tort came to be seen as primarily concerned with negligence and how the Alien Tort Statute has helped establish the importance of tort law in international cases In a series of cases starting with *Filartiga* and culminating most recently in *Sosa* Fletcher shows how torture cases led to the reawakening of the Alien Tort Statute changing US law and giving legal practitioners a tool with which to assist victims of torture and other extreme human rights abuses This leads to an examination of Agent Orange and the possible commission of war crimes in the course of its utilisation and the theory of liability for aiding and abetting the US military and other military forces when they commit war crimes The book concludes by looking at the cutting edge cases in this area particularly those involving liability for funding terrorism and the remedies available particularly the potential offered by the compensation chamber in the International Criminal Court

The International Sale of Goods Revisited Petar Sarcevic,Petar [ar?evi?],Paul Volken,2001-06-27 The contributors to this volume well known experts from Europe and the US analyze various issues relating to the United Nations Convention on Contracts for the International Sale of Goods CISG With its current global network of 58 Contracting States the CISG is widely applied in practice today To make

the growing case law on this subject matter readily accessible the UNCITRAL Secretariat in Vienna has set up a reporting system for national court decisions relating to the CISG The extensive documentation already collected there and elsewhere will surely have a lasting impact on the ongoing scholarly debate on this topic The present book is intended to contribute to this debate by addressing controversial issues relating to the interpretation and application of some important provisions of the new sales law In addition several authors also deal with the development of international principles of contract law such as the Principles of European Contract Law the UNIDROIT Principles and the lex mercatoria In view of the increasing number of such rules a discussion of the CISG would be incomplete without taking account of the relationship of the Convention to these principles as well

New Contribution to the Analysis and Evaluation of Safety Architectures Ossmane Krini,2025-03-03 The objective of this scientific work is to research test and develop an approach and design a safety architecture for highly safe available and autonomous systems with regard to functional safety using degradation concepts A novel safety oriented 4oo6 sensor structure targeting functional safety aspects has been thoroughly scientifically investigated developed and validated This Sensor Safety 4oo6 structure represents a major challenge as it integrates innovative approaches to improve system safety The new safety strategy for autonomous systems enables operation in different modes and offers flexibility and adaptability The 4oo6 safety architecture analyzed and developed in the scientific study has a self monitoring structure that enables early detection of faults This ensures that both the safety and availability of the system are maintained in the long term The new Safety 4oo6 structure represents a new challenge as such an architecture does not yet exist in the IEC 61508 safety standard or in DIN EN 61511 With this new architecture a significantly higher level of safety and availability can be achieved

Private International Law Aspects of Corporate Social Responsibility Catherine Kessedjian,Humberto Cantú Rivera,2020-03-06 This book addresses one of the core challenges in the corporate social responsibility or business and human rights debate how to ensure adequate access to remedy for victims of corporate abuses that infringe upon their human rights However ensuring access to remedy depends on a series of normative and judicial elements that become highly complex when disputes are transnational In such cases courts need to consider and apply different laws that relate to company governance to determine the competent forum to define which bodies of law to apply and to ensure the adequate execution of judgments The book also discusses how alternative methods of dispute settlement can relate to this topic and the important role that private international law plays in access to remedy for corporate related human rights abuses This collection comprises 20 national reports from jurisdictions in Europe North America Latin America and Asia addressing the private international law aspects of corporate social responsibility They provide an overview of the legal differences between geographical areas and offer numerous examples of how states and their courts have resolved disputes involving private international law elements The book draws two preliminary conclusions that there is a need for a better understanding of the role that private international law plays in cases involving transnational elements in order to better design transnational solutions to the issues posed by economic globalisation and that the treaty negotiations on

business and human rights in the United Nations could offer a forum to clarify and unify several of the elements that underpin transnational disputes involving corporate human rights abuses which could also help to identify and bridge the existing gaps that limit effective access to remedy Adopting a comparative approach this book appeals to academics lawyers judges and legislators concerned with the issue of access to remedy and reparation for corporate abuses under the prism of private international law *International Encyclopedia of Comparative Law* René David,1975 **Advances in Cryptology - ASIACRYPT 2021** Mehdi Tibouchi,Huaxiong Wang,2021-11-30 The four volume proceedings LNCS 13090 13091 13092 and 13093 constitutes the proceedings of the 27th International Conference on the Theory and Application of Cryptology and Information Security ASIACRYPT 2021 which was held during December 6 10 2021 The conference was planned to take place in Singapore but changed to an online format due to the COVID 19 pandemic The total of 95 full papers presented in these proceedings was carefully reviewed and selected from 341 submissions The papers were organized in topical sections as follows Part I Best paper awards public key cryptanalysis symmetric key cryptanalysis quantum security Part II physical attacks leakage and countermeasures multiparty computation enhanced public key encryption and time lock puzzles real world protocols Part III NIZK and SNARKs theory symmetric key constructions homomorphic encryption and encrypted search Part IV Lattice cryptanalysis post quantum cryptography advanced encryption and signatures zero knowledge proofs threshold and multi signatures authenticated key exchange **Proceedings of the Tenth International Conference on Mathematics and Computing** Debasis Giri,Jaideep Vaidya,S.
