Internet Owners Manual:

Internet Core Protocols: The Definitive Guide Eric Hall, 2000-02-02 If you've ever been responsible for a network you know that sinking feeling your pager has gone off at 2 a.m. the network is broken and you can't figure out why by using a dial in connection from home. You drive into the office dig out your protocol analyzer and spend the next four hours trying to put things back together before the staff shows up for work. When this happens you often find yourself looking at the low level guts of the Internet protocols you're deciphering individual packets trying to figure out what is or isn't happening. Until now the only real guide to the protocols has been the Internet RFCs and they're hardly what you want to be reading late at night when your network is down. There hasn't been a good book on the fundamentals of IP networking aimed at network administrators until now. *Internet Core Protocols: The Definitive Guide* contains all the information you need for low level network debugging. It provides thorough coverage of the fundamental protocols in the TCP/IP suite: IP, TCP, UDP, ICMP, ARP in its many variations and IGMP. The companion volume *Internet Application Protocols: The Definitive Guide* provides detailed information about the commonly used application protocols including HTTP, FTP, DNS, POP3 and many others. It includes many packet captures showing you what to look for and how to interpret all the fields. It has been brought up to date with the latest developments in real world IP networking. The CD-ROM included with the book contains Shomiti's Surveyor Lite a packet analyzer that runs on Win32 systems plus the original RFCs should you need them for reference. Together this package includes everything you need to troubleshoot your network except coffee.

On The Move to Meaningful Internet Systems 2003: OTM 2003 Workshops Zahir Tari, 2003-10-25 missions in fact also treat an envisaged mutual impact among them As for the 2002 edition in Irvine the organizers wanted to stimulate this cross pollination with a program of shared famous keynote speakers this year we got Sycara, Ble Soley and Mylopoulos and encouraged multiple attendance by providing authors with free access to another conference or workshop of their choice We received an even larger number of submissions than last year for the three conferences 360 in total and the workshops 170 in total Not only can we therefore again claim a measurable success in attracting a representative volume of scientific papers but such a harvest allowed the program committees of course to compose a high quality cross section of worldwide research in the areas covered In spite of the increased number of submissions the Program Chairs of the three main conferences decided to accept only approximately the same number of papers for presentation and publication as in

2002 i.e. around 1 paper out of every 4-5 submitted. For the workshops the acceptance rate was about 1 in 2. Also for this reason we decided to separate the proceedings into two volumes with their own titles and we are grateful to Springer Verlag for their collaboration in producing these two books. The reviewing process by the respective program committees was very professional and each paper in the main conferences was reviewed by at least three referees.
