The Structure of Moral Revolutions Robert Baker, 2019-11-12 A theoretical account of moral revolutions illustrated by historical cases that include the criminalization and decriminalization of abortion and the patient rebellion against medical paternalism We live in an age of moral revolutions in which the once morally outrageous has become morally acceptable and the formerly acceptable is now regarded as reprehensible Attitudes toward same sex love for example and the proper role of women have undergone paradigm shifts over the last several decades In this book Robert Baker argues that these inversions are the product of moral revolutions that follow a pattern similar to that of the scientific revolutions analyzed by Thomas Kuhn in his influential book *The Structure of Scientific Revolutions* After laying out the theoretical terrain Baker develops his argument with examples of moral reversals from the recent and distant past He describes the revolution led by the utilitarian philosopher Jeremy Bentham that transformed the postmortem dissection of human bodies from punitive desecration to civic virtue the criminalization of abortion in the nineteenth century and its decriminalization in the twentieth century and the invention of a new bioethics paradigm in the 1970s and 1980s supporting a patient led rebellion against medical paternalism Finally Baker reflects on moral relativism arguing that the acceptance of absolute moral truths denies us the diversity of moral perspectives that permit us to alter our morality in response to changing environments

The Dying Experience Samuel H. LiPuma, Joseph P. DeMarco, 2019-03-27 This vitally important book attempts to move beyond the current death denying culture The use of euphemistic and defiant phrases when dealing with terminal disease such as She lost her battle with cancer was more appropriate when medical doctors could do little to prolong life But treatments and technologies have significantly changed Now life prolonging interventions have outpaced our willingness to use medical intervention to secure patient control over death and dying We now face a new question When is it morally appropriate for medical intervention to hasten the dying process LiPuma and DeMarco answer by endorsing expanded options for dying patients Unwanted aggressive treatment regimens and protocols which reject hastening death should be replaced by a patient's moral right in carefully defined circumstances to hasten death by means of medical intervention Expanded options range from patient directed continuous sedation without hydration to physician assisted suicide for those with progressive degenerative disorders such as Alzheimer's The authors overriding goal is to humanize the dying process by expanding patient centered autonomous control

sociological movements and economic conditions From publisher s description Alternative Approaches to Causation Yafeng Shan,2024-01-09 Causation is one of the most controversial topics in philosophy There is a wide range of philosophical accounts of causation for example the regularity account the probabilistic account the counterfactual account the interventionist account which can be all classified as difference making accounts and the mechanistic account Many argue that only one of these accounts is correct as there is only one type of causal relation causal monism while others maintain that there are multiple types of causation causal pluralism In addition there are eliminativists argue that science has no need of causation at all while primitivists maintain that causation is unanalysable Recently the difference making and mechanistic approaches have dominated recent philosophical discussion of causation Other approaches and positions have been insufficiently discussed and assessed especially in the context of philosophy of science This volume explores and examines alternative approaches to causation It revisits causal primitivism and causal eliminativism in the context of recent literature It further explores the pluralistic approach the fictionalist approach the inferentialist approach and the informational approach It also examines the application of the dispositional approach the epistemic approach and the powerful particulars approach to the natural and social sciences Overall the volume is complementary to the recent discussion on the difference making and mechanistic approaches and sheds new light on the metaphysical epistemological conceptual and methodological issues on causation As such it provides foundations for further research and teaching of this hotly debated topic Conference proceedings.
