Bureau of Labor Statistics,1975 **Aesthetic Concrete Barrier Design** Delbert Lance Bullard,National Cooperative Highway Research Program,2006 This report contains guidelines for aesthetic treatment of concrete safety shape barriers The report will be of particular interest to design and safety practitioners with responsibility for roadside safety improvements The increasing

application of context sensitive design solutions for highway projects has created a national need for aesthetic improvement of typical highway features Requests for concrete barrier treatments and bridge rails that contribute to the overall aesthetic experience are increasing Concrete barriers e g New Jersey F shapes single slope and vertical face designs are often the barriers of choice in urban and suburban environments Many transportation agencies and communities have expressed a desire for aesthetic treatments for these standard shapes To date there has been limited evaluation to determine which aesthetic treatments are safe and practical Designers need guidance regarding the safety implications of aesthetic treatments for concrete barriers

Techniques, Tools and Methodologies Applied to Global Supply Chain Ecosystems Jorge Luis García-Alcaraz,Cuauhtémoc Sánchez-Ramírez,Liliana Avelar-Sosa,Giner Alor-Hernández,2019-08-29 This book presents the latest developments concerning techniques tools and methodologies in supply chain ecosystems It gathers contributions from a variety of experts who analyze a range of case studies and industrial sectors such as manufacturing energy agricultural healthcare humanitarian logistics and urban goods distribution to name but a few The book is chiefly intended to meet the needs of two sectors firstly the academic sector so as to familiarize students professors and researchers with the tools that are now being used to optimize supply chains and secondly the industrial and managerial sector so that supply chain management practitioners can benefit from methods and tools that are yielding valuable results in other contexts

Resources in Education ,1993 *A Process-Centric View on Predictive Maintenance and Fleet Prognostics. Development of a Process Reference Model and a Development Method for Fleet Prognostics to Guide Predictive Maintenance Projects* Carolin Wagner,2022-08-12 In the age of digitalization and the fourth industrial revolution predictive maintenance is becoming increasingly important as a proactive maintenance type Despite the economic benefits that predictive maintenance generates for companies its practical application is still in its early stages This is often due to two prevailing challenges First there is a deficiency of knowledge about predictive maintenance and its concrete realization Second there is a lack of high quality and rich data of historical machine failures To increase the representativeness of data data from several similar machines i e a fleet should be considered To foster the effective implementation of predictive maintenance supportive guidance in the realization of a predictive maintenance project is needed For this reason this dissertation presents a process reference model and a development method for fleet prognostics The process reference model describes a comprehensive and application independent view of the complete predictive maintenance process The model is supplemented by the fleet prognostic development method To address the specific characteristics of the fleet a systematic process is depicted which provides a means to assess the heterogeneity of the fleet from a data driven perspective and simplifies the design of an algorithm considering fleet data Finally the applicability and value of the research results are demonstrated with three industrial cases
