Reaching and Teaching Diverse Populations Mary Buckelew,Andrea Fishman,2011 By engaging trainee teachers in activities that promote their understanding of diversity topics this book deepens their understanding of the interrelationship of the community the school classroom dynamics and cultures **Teaching Political Science to Undergraduates** Laure Paquette,2016-01-15 By 2020 half of the world s population and most university students will have a supercomputer in their pockets This revolution will affect the way students respond to higher education The university classroom must henceforth engage students and the classic lecture format alone might not be enough to do so This book answers the question how university students can learn in the classroom what they cannot learn in any other way The answer is inspired by options that are not available to political scientists in the way that they are in the laboratories for the sciences in the performances for the live arts and in the studios for visual arts as well as ideas that are already present but not widespread in the discipline problem solving and case studies as in the professional schools and simulation exercises in many other disciplines This book proposes therefore an active pedagogy for political science at a time when active pedagogy is more important than ever Prof Laure Paquette PhD has been a visiting researcher or professor in 23 countries She has advised several foreign governments as well as her own Canada and has published extensively in four languages This is her sixteenth book *Teaching Communication* Anita L.

Vangelisti,John A Daly,Gustav W. Friedrich,2013-11-05 The field of communication was founded in part because of a need to make people better communicators That meant teaching them how to communicate more effectively whether it be in public settings or in private Most of that teaching has happened within the classroom and many professionals have spent their lives instructing others on various aspects of communication Inside this second edition the editors have assembled a fully

comprehensive and contemporary discussion of topics and issues concerning the teaching of communication. The chapters contained herein contributed by key voices throughout the communication discipline address conceptual as well as practical issues related to communication instruction. The contents of this new edition reflect the dramatic changes that have occurred in communication education since the publication of the first edition in 1990. This book focuses initially on the goals of communication education then delves into the preparation of specific communication courses. It includes assistance for instructors in organizing instructional content and discusses the use of instructional strategies and tools as well as offering ideas on evaluating the processes and products of instruction. The volume also covers unique teaching assignments that may be encountered from the basic course to continuing education and addresses 2 year college teaching directing forensic programs distance education and consulting. It concludes with important professional issues faced by both new and experienced communication instructors including ethics and political issues within classrooms and departments. This volume is a necessity for anyone starting out a career as a communication instructor. Veteran educators who know that learning to teach is a continual growth experience will find useful and invaluable information within the book's pages. Whatever background and level of experience all communication educators will find this new edition to be an essential resource for their work.

Teaching Science to Every Child John Settlage, Sherry Southerland, 2012-04-23. *Teaching Science to Every Child* provides timely and practical guidance about teaching science to all students. Particular emphasis is given to making science accessible to students who are typically pushed to the fringe especially students of color and English language learners. Central to this text is the idea that science can be viewed as a culture including specific methods of thinking particular ways of communicating and specialized kinds of tools. By using culture as a starting point and connecting it to effective instructional approaches this text gives elementary and middle school science teachers a valuable framework to support the science learning of every student. Written in a conversational style it treats readers as professional partners in efforts to address vital issues and implement classroom practices that will contribute to closing achievement gaps and advancing the science learning of all children. Features include Point Counterpoint essays that present contrasting perspectives on a variety of science education topics explicit connections between National Science Education Standards and chapter content and chapter objectives bulleted summaries key terms reflection and discussion questions. Additional resources are available on the updated and expanded Companion Website www.routledge.com/textbooks/9780415892582.

Changes in the Second Edition Three entirely new chapters Integrated Process Skills Learning and Teaching Assessment Technological tools and resources embedded throughout each chapter Increased attention to the role of theory as it relates to science teaching and learning Expanded use of science process skills for upper elementary and middle school Additional material about science notebooks Provided by publisher
