spectacle the urban spaces were projected as the theatre d cor while residents and visitors became the spectators The images of Istanbul pile up in videos and posters to show the city in every aspect in which everything becomes mishmash and the message gets lost in the chaos While Istanbul is depicted as a mystified city through Orientalist representations this image of Istanbul moves between the opposite ends of the contrasting pairs and in contestation Culture defined as making sense of the world Hall 1997 2 is an integral part of branding a place which involves cultural exchange Anholt 2005 140 Mega events may be used as forms of advertising for city marketing and branding where the signification is not only about production of meaning but also staging of the meaning The cities hosting mega events can be turned into the protagonists of the spectacle by showcasing their cultural products as well as cultural being Thus what staged there are the city its image as well as the events The mega events are helpful to spread the word about the city but the meaning is created also through imaging the city and positioning this image in the minds of the people

Introducing Anthropology Merryl Wyn-Davis, 2014-12-01 Anthropology originated as the study of primitive cultures But the notion of primitive exposes presumptions of civilized superiority and the right of the West to speak for less evolved others With the fall of Empire anthropology became suspect and was torn by dissension from within Did anthropology serve as a handmaiden to colonialism Is it a science created by racism to prove racism Can it aid communication between cultures or does it reinforce our differences Introducing Anthropology is a fascinating account of an uncertain human science seeking to transcend its unsavoury history It traces the evolution of anthropology from its genesis in Ancient Greece to its varied forms in contemporary times Anthropology s key concepts and methods are explained and we are presented with such big name anthropologists as Franz Boas Bronislaw Malinowski E E Evans Pritchard Margaret Mead and Claude Levi Strauss The new varieties of self critical and postmodern anthropologies are examined and the leading question of the impact of anthropology on non Western cultures is given centre stage Introducing Anthropology is lucid in its arguments its good humour supported by apt and witty illustrations This book offers a highly accessible invitation into anthropology

Introducing Romanticism Duncan Heath, 2014-12-01
Philosophy art literature music and politics were all transformed in the turbulent period between the French Revolution of 1789 and the Communist Manifesto of 1848 This was the age of the Romantic revolution when modern attitudes to political and artistic freedom were born When we think of Romanticism flamboyant figures such as Byron or Shelley instantly spring to mind but what about Napoleon or Hegel Turner or Blake Wagner or Marx How was it that Romanticism could give birth to passionate individualism and chauvinistic nationalism at the same time How did it prefigure the totalitarian movements of the 20th century Duncan Heath and Judy Boreham answer these questions and provide a unique overview of the many interlocking strands of Romanticism focusing on the leading figures in Britain Germany France Italy Russia and America

Introducing Aesthetics Christopher Kul-Want, 2014-12-01 What is beauty and what is truth These are some of the questions which aesthetics tries to answer In our everyday life we talk about the aesthetics of an artwork or a piece of design But aesthetics goes beyond the simple experience of art It is also a branch of philosophy concerned with the whole nature of experience itself explored through our perceptions feelings and emotions

Introducing Infinity Brian Clegg, 2014-12-01
Infinity is a profoundly counter intuitive and brain twisting subject that has inspired some great thinkers and provoked and shocked others The ancient Greeks were so horrified by the implications of an endless number that they drowned the man who gave away the secret And a German mathematician was driven mad by the repercussions of his discovery of transfinite numbers Brian Clegg and Oliver Pugh's brilliant graphic tour of infinity features a cast of characters ranging from Archimedes and Pythagoras to al Khwarizmi Fibonacci Galileo Newton Leibniz Cantor Venn G del and Mandelbrot and shows how infinity has challenged the finest minds of science and mathematics Prepare to enter a world of paradox

Introducing Plato Dave Robinson, 2014-12-01 Introducing Plato begins by explaining how philosophers like Socrates and Pythagoras influenced Plato's thought It provides a clear account of Plato's puzzling theory of knowledge and explains how this theory then directed his provocative views on politics ethics and individual liberty It offers detailed critical commentaries on all of the key doctrines of Platonism especially the very odd theory of Forms and concludes by revealing how Plato's philosophy stimulated the work of important modern thinkers such as Karl Popper Martha Nussbaum and Jacques Derrida

Introducing Political Philosophy Dave Robinson, 2014-12-01 Essential illustrated guide to key ideas of political thought Philosophers have always asked fundamental and disturbing questions about politics Plato and Aristotle debated the merits of democracy The origins of society the state and government authority were issues addressed by Hobbes

Rousseau Hegel Marx and many other philosophers Introducing Political Philosophy explains the central concepts of this intriguing branch of philosophy and presents the major political theorists from Plato to Foucault How did governments get started Why should they be obeyed Could we live without them How much power should they have Is freedom a right Which is the best form of government In the wake of consumerism and postmodernism our need for a better grasp of political ideas is greater than ever Dave Robinson s account of this complex subject is always clear informative and accompanied by the entertainingly inventive illustrations of Judy Groves

Strategic Design Thinking Natalie W. Nixon, 2015-10-22 Who can design For too long that question has highlighted the supposed division between right brain dominant creative types and left brain dominant analytical types Such a division is not practical for preparing students to become innovative contributors to the complex world of design Strategic Design Thinking guides readers to cultivate hybrid thinking whether their background is design finance or any discipline in between This book is an introduction to an integrative approach using the lens of design thinking as a way to see the world The focus is on process instead of solution and on connecting disparate ideas instead of getting bogged down by silos of specialization Through this book students will be introduced to design management strategic design service design and experience design
