Teaching Science Through Trade Books Christine Anne Royce, Karen Rohrich Ansberry, Emily Rachel Morgan, 2012 If you like the popular Teaching Science Through Trade Books columns in NSTA's journal Science and Children or if you've become enamored of the award-winning Picture Perfect Science Lessons series you'll love this new collection. Reese-Weber, 2016-12-01 Now with SAGE Publications Cheryl Cisero Durwin and Marla Reese Weber's *EdPsych Modules* uses an innovative implementation of case studies and a modular format to address the challenge of effectively connecting theory and research to practice. Each module is a succinct stand-alone topic that represents every subject found in traditional chapter texts and can be used in any order for maximum flexibility in organizing your course. Each of the book's eight units of modules begins with a set of four case studies: early childhood, elementary, middle school, and secondary, and ends with Assess and Reflect and Evaluate questions and activities to encourage comprehension and application of the research and theories presented. The case approach and the extensive pedagogy that support it allows students to constantly see the applications of the theories and research that they are studying in the text. **Today's Basic Science: The atom and the earth** John
