

morality of active euthanasia and passive euthanasia. He places the doctrine explaining this difference at the beginning of his essay so as to pick it apart and criticize it bit by bit throughout his argument. By first explaining what the doctrine suggests, Rachels is rationally leaving room for the reader to think for him/herself before listening to his argument. This is a strong tactic because rather than jumping into a biased and subjective opinion piece, he is allowing the doctrine to truly sink into the reader's mind so that its original wording He then goes on to offer examples, both fictional and authentic, to prove his point that, contrary to written doctrines, there is no *moral* difference between active and passive euthanasia.

Rachels calls upon the reader to imagine a situation in which a patient is suffering from throat cancer, which is causing an enormous amount of pain that cannot be alleviated. With death surely in the near future, the patient asks the doctor to hasten this process. The doctor's only option, according to the doctrine, is to cease all forms of medical aid and allow natural forces to kill the patient. Rachels breaks down the morality of choosing passive euthanasia by emphasizing the lack of humanitarianism that it involves. By withholding treatment, a doctor could potentially be perpetuating the patient's pain. Keeping a patient as comfortable and as painless as possible is undoubtedly top priority for medical professionals. Since the patient is headed towards an imminent death, without any possibility of recovery, the doctor's *and* the family's priority should be ridding the patient of his/her pain. This example, which is fictional yet surely common in real life circumstances, is strong in its validity by way of its being undoubtedly the most basic in terms of the argument based on euthanasia's moral distinction. It involves the doctor, the patient, and the patient's family; everyone is at

Minds, Ethics, and Conditionals Ian Ravenscroft, 2009-01-22 An illustrious international line up of contributors present new essays on themes from the philosophy of Frank Jackson discussing his groundbreaking work on supervenience and conceptual analysis mind and colour normative ethics and metaethics and conditionals Jackson offers a substantial and illuminating reply to his critics *Modes of Representation* Richard Kimberly Heck, 2024-03-04 Lois Lane knows that Superman can fly but she does not know that Clark Kent can fly How can that be given that Superman and Clark are one and the same To answer this question Frege famously distinguished the reference of a name the thing it is a name of from what he called its sense or mode of presentation The sense was meant to capture our necessarily limited perspective on reference and to explain the difference in cognitive value between Superman can fly and Clark can fly Frege s distinction has been widely discussed in the last century but much about it remains unclear In this collection Richard Kimberly Heck one of the world s foremost experts on Frege s philosophy distinguishes three aspects of Frege s famous puzzle and explores the connections between them Their wide ranging discussion touches on issues in philosophy of mind philosophy of language philosophy of logic the history of analytic philosophy and meta philosophy Heck argues that while many of the details of Frege s position cannot be defended his famous puzzle still has much to teach us both about the foundations of cognition and about the nature of linguistic communication *Modes of Presentation* presents eight previously published papers two of which are significantly expanded There are also three new chapters three new postscripts responding to criticisms and a substantial overview that introduces the issues and traces connections between the chapters **Austrian Philosophy Past and Present** Keith Lehrer, Johann Christian Marek, 1997 This book is about Austrian philosophy leading up to the philosophy of Rudolf Haller It emerged from a philosophy conference held at the University of Arizona by Keith Lehrer with the support of the University of Arizona and Austrian Cultural Institute We are grateful to the University of Arizona and the Austrian

Cultural Institute for their support to Linda Radzik for her editorial assistance to Rudolf Haller for his advice and illuminating autobiographical essay and to Ann Hickman for preparing the camera ready typescript The papers herein are ones presented at the conference The idea that motivated holding the conference was to clarify the conception of Austrian Philosophy and the role of Rudolf Haller therein Prof Rudolf Haller of Karl Franzens University of Graz has had a profound influence on modern philosophy which modest man that he is probably amazes him He has made fine contributions to many areas of philosophy to aesthetics to philosophy of language and the theory of knowledge His seven books and more than two hundred articles testify to his accomplishments But there is something else which he did which was the reason for the conference on Austrian Philosophy in his honor He presented us as Barry Smith explains with a unified conception of Austrian Philosophy

How to Take Skepticism Seriously Adam Leite, 2024 How to Take Skepticism Seriously argues that philosophical skepticism the idea that we cannot know anything definitive about the world around us is false for straightforward reasons that we can all appreciate when we reflectively work from within our everyday practices procedures and commitments No epistemological theory building is needed Adam Leite thus offers a resolution to a problem that has haunted philosophy since Descartes implements and defends a neglected methodological approach and elucidates the tradition of G E Moore and J L Austin While engaging with prominent work in contemporary epistemology the book offers a fundamentally different understanding of the relation between core philosophical issues and everyday life A Quantitative Portrait of Analytic Philosophy Eugenio Petrovich, 2024-04-16 This book offers an unprecedented quantitative portrait of analytic philosophy focusing on two seemingly marginal features of philosophical texts citations and acknowledgements in academic publications Originating from a little network of philosophers based in Oxford Cambridge and Vienna analytic philosophy has become during the Twentieth century a thriving philosophical community with thousands of members worldwide Leveraging the most advanced techniques from bibliometrics citations and acknowledgments are used in this book to shed light on both the epistemology and the sociology of this philosophical field illuminating the intellectual trajectory of analytic philosophy as well as the social characteristics of the analytic community Special attention is dedicated to the last forty years providing insights into a phase of analytic philosophy which is still understudied by historians of philosophy In the eight chapters of the book readers will find not only numerous quantitative investigations and technical explanations but also a robust theoretical framework and epistemological reflections on the strengths and limitations of quantitative methods for the study of philosophy With its strong interdisciplinary appeal this book will engage a wide range of scholars including historians of philosophy seeking new methodologies analytic philosophers interested in a new look at their discipline and scholars in digital humanities bibliometrics and quantitative studies of science who will find many innovative techniques for investigating disciplinary fields **Pyrrhonism in Ancient, Modern, and Contemporary Philosophy** Diego E. Machuca, 2011-07-17 In recent years there has been renewed interest in Pyrrhonism among both philosophers and historians of philosophy This

skeptical tradition is complex and multifaceted since the Pyrrhonian arguments have been put into the service of different enterprises or been approached in relation to interests which are quite distinct. The diversity of conceptions and uses of Pyrrhonism accounts for the diversity of the challenges it is deemed to pose and of the attempts to meet them. The present volume brings together twelve essays by leading specialists which explore the history and philosophical significance of this form of skepticism; they discuss some thorny questions concerning ancient Pyrrhonism, explore its influence on certain modern thinkers and examine it in relation to contemporary analytic philosophy. The essays combine historical and exegetical analysis with an assessment of the philosophical merits of the Pyrrhonian outlook with the aim of understanding it both in its historical context and in connection with contemporary concerns. This volume, the first entirely devoted to a detailed study of the Pyrrhonian tradition, is intended to open up new exegetical and philosophical perspectives on Pyrrhonism and to motivate further examination of certain difficult issues. It will be a valuable resource for scholars of ancient philosophy, historians of modern philosophy and epistemologists as well as for graduate students interested in skepticism.

**Essays on the Philosophy of Terence Horgan** Johannes L. Brandl, Olga Markič, 2002  
**Mind, Meaning, and Knowledge** Annalisa Coliva, 2012-09-27 This volume is a collective exploration of major themes in the work of Crispin Wright, one of today's leading philosophers. These newly commissioned papers are divided into four sections preceded by a substantial Introduction which places them in the context of the development of Wright's ideas. The distinguished contributors address issues such as the rule following problem, knowledge of our meanings and minds, truth, realism, anti-realism and relativism, as well as the nature of perceptual justification, the cogency of arguments such as G. E. Moore's celebrated proof of an external world and scepticism about the material world. Some papers explore the relationship of Wright's ideas with those of Ludwig Wittgenstein, whose influence has always been a prominent aspect of Wright's philosophy. The essays collectively testify to the enormous interest and relevance of Wright's seminal contributions for present-day debates in areas as diverse as the philosophy of language and mind, metaphysics and epistemology, and significantly advance research in these areas. The volume also contains Wright's substantial responses to his critics which offer the most up-to-date versions of his ideas and a vigorous defence of his philosophy.

**Articulating a Thought** Eli Alshanetsky, 2019-11-28 Articulating a thought can be astoundingly easy. We generally have no trouble expressing complex ideas that we have never considered before, though not always. Articulating a thought can also be extremely hard. Our difficulties in articulating thoughts pervade many aspects of philosophical inquiry as well as many ordinary situations. While we may overcome some of the challenges through education and practice, we cannot do away with them altogether. And the hardest thoughts to articulate often come to us unbidden as we neither assemble them from other thoughts nor get them from any source of external information. They can come from us freely and spontaneously, and frequently we articulate them in order to find out what they are. In many cases we would not bother articulating our thoughts if we already had this knowledge; yet when we find the right words we can often instantly

tell that they express our thought How do we manage to recognize the formulations of our thoughts in the absence of prior knowledge of what we are thinking And why is it that producing a public language formulation contributes in any way to the deeply private undertaking of coming to know our own thoughts In *Articulating a Thought* Eli Alshanetsky considers how we make our thoughts clear to ourselves in the process of putting them into words and examines the paradox of those difficult cases where we do not already know what we are struggling to articulate Readings on Color: The philosophy of color Alex Byrne, David R. Hilbert, 1997 *Explaining the Reasons We Share* Mark Schroeder, 2014-05-22 Normative ethical theories generally purport to be explanatory to tell us not just what is good or what conduct is right but why Drawing on both historical and contemporary approaches Mark Schroeder offers a distinctive picture of how such explanations must work and of the specific commitments that they incur According to Schroeder explanatory moral theories can be perfectly general only if they are reductive offering accounts of what it is for something to be good right or what someone ought to do So ambitious highly general normative ethical theorizing is continuous with metaethical inquiry Moreover he argues that such explanatory theories face a special challenge in accounting for reasons or obligations that are universally shared and develops an autonomy based strategy for meeting this challenge in the case of requirements of rationality *Explaining the Reasons We Share* pulls together over a decade of work by one of the leading figures in contemporary metaethics One new and ten previously published papers weave together treatments of reasons reduction supervenience instrumental rationality and legislation to paint a sharp contrast between two plausible but competing pictures of the nature and limits of moral explanation one from Cudworth and one indebted to Kant A substantive new introduction provides a map to reading these essays as a unified argument and qualifies their conclusions in light of Schroeder's current views Along with its sister volume *Expressing Our Attitudes* this volume advances the theme that metaethical inquiry is continuous with other areas of philosophy Content and Modality Judith Thomson, Alex Byrne, 2006-10-12 Eleven distinguished philosophers have contributed specially written essays on a set of topics much debated in recent years including physicalism qualia semantic competence conditionals presuppositions two dimensional semantics and the relation between logic and metaphysics All these topics are prominent in the work of Robert Stalnaker a major presence in contemporary philosophy in honour of whom the volume is published It also contains a substantial new essay in which Stalnaker replies to his critics and sets out his current views on the topics discussed Contributors Richard Heck Frank Jackson William Lycan Vann McGee John Perry Paul Pietroski Sydney Shoemaker Scott Soames Daniel Stoljar Timothy Williamson and Stephen Yablo **The Philosopher's Annual**, 2002 Consciousness and the Limits of Objectivity Robert J. Howell, 2013-06-14 In *Consciousness and the Limits of Objectivity* Robert J Howell argues that the options in the debates about consciousness and the mind body problem are more limited than many philosophers have appreciated Unless one takes a hard line stance which either denies the data provided by consciousness or makes a leap of faith about future discoveries one must admit that no objective picture of our

world can be complete Howell argues however that this is consistent with physicalism contrary to received wisdom After developing a novel neo Cartesian notion of the physical followed by a careful consideration of the three major anti materialist arguments Black s Presentation Problem Jackson s Knowledge Argument and Chalmers Conceivability Argument Howell proposes a subjective physicalism which gives the data of consciousness their due while retaining the advantages of a monistic physical ontology
