*Tropical Phyconomy Coalition Development* Alan T. Critchley, Anicia Q. Hurtado, Iain Charles Neish, 2024-03-20 Tropical seaweeds represent a major source of diversity and potential for cultivation Cultivation of seaweeds has been coined phyconomy derived from phycology and agronomy One of the world's most important groups of tropical seaweeds is the eucheumatoids comprising members of the genera Kappaphycus and Eucheuma Whilst the biomass from these seaweeds is mostly used to produce colloids i.e. various carrageenans trends are changing and new value added applications are emerging including bioactives for agriculture pharmaceutical applications as well as bioplastics and possibly energy when processed as part of a MUZE i.e. multi stream zero effluent or biorefinery approach Phyconomic activities around the production of seaweed biomass provides socio economic benefits for many hundreds of thousands of global coastal dwellers around a circum tropical belt However times are changing and the once repetitive manual aspects of attaching seaweed fragments to ropes and nets is beginning to be mechanized Whilst it has taken agronomy several thousands of years to develop on land its phyconomic counterpart is at best 50 years old in relation to developments in cultivation of eucheumatoids Activities around cultivation of these tropical seaweeds can contribute to achieving the UN Sustainable Development Goals This book contains contributions from many of

the world's authorities on tropical seaweed farming with a focus on the eucheumatoids. There are many lessons learned and best practice examples which will be of interest to students of phyconomy, phycology, marine science, industrial users of cultivated biomass as well as practitioners in charge of coastal zone management and ensuring responsible and sustainable socio-economic benefits are derived from marine resources for coastal dwellers. **Parasites and Parasitic Diseases** Gilberto Antonio Bastidas Pacheco, 2019-04-24 Parasitic diseases are considered nowadays as an important public health problem due to the high morbidity and mortality rates registered in the world. These diseases result in more severe consequences for the social order of tropical and subtropical countries because many of them have low economic income that makes it even more difficult to design and implement health control programs. This situation opens the door to the emergence and reemergence of these diseases; therefore, it is convenient, necessary, and essential to study and update the epidemiological behavior of tropical diseases with the objective of offering official health professionals and institutions current information for decision making in this area to ensure social welfare. **Practical Applications of Medical Geology** Malcolm Siegel, Olle Selinus, Robert Finkelman, 2021-08-01 This edited volume provides a framework for integrating methods and information drawn from geological and medical sciences and provides case studies in medical geology to illustrate the usefulness of this framework for crafting environmental and public health policies related to natural materials. The relevance of medical geology research to policy decisions is a topic rarely discussed, and this volume attempts to be a unique source for researchers and policy makers in the field of medical geology in addressing this gap in practical medical geology applications. The book's four sections establish this framework in detail using risk assessment, case studies, data analyses, and specific medical geology techniques. Following an introduction to medical geology in the context of risk assessment and risk management, the second section discusses specific methods used in medical geology in the categories of geoscience, biomedicine, and data sources. The third section discusses the medical geology of natural materials, energy use, and environmental and workplace impacts. This section includes specific case studies in medical geology and describes how the methods and data from the previous section are used in a medical geology analysis. The fourth section includes a guide to the medical geology literature and provides some examples of medical geology programs in Asia and Africa. **Trails in Academic and Administrative Leadership in Kenya** Michieka, Ratemo Waya, 2017-05-03 Scholars, especially those interested in understanding how leadership has inhibited academic freedom and hindered effectiveness of institutions of higher learning, have for long been engaged by the very important manner in which governance and leadership of higher education institutions in Africa is constituted and managed. The fact that there has been a dearth of work based on the experiences of those who have served as university leaders has created a major gap. Questions remain on how leaders of higher education institutions are identified, how they are prepared, the personal predispositions that individuals bring to the exercise of such positions, and their personal experiences regarding what energizes or inhibits the performance of their work.

Until recently presidents in most African countries served as chancellors of public universities identification of those who served as university leaders was largely a political process But much has changed with most countries establishing oversight bodies and the overall governance of higher education institutions divorced from the day to day political processes Trails in Academic and Administrative Leadership in Kenya provides a personal account of the experiences in higher education leadership from an individual whose tenure in leadership straddled the two eras In this book Prof Michieka provides an account of how his early education prepared him for roles in academic and institutional leadership in Kenya The author shares his experiences on the trails he had to navigate as an academic a vice chancellor and a chairperson of university council at a time when universities in Kenya were transiting from extreme government administrative control to a greater degree of operational autonomy Readers will find in this work thought provoking insights on how leaders of higher education institutions in Kenya have had to balance between demands of the political system and the need to safeguard academic traditions in the everyday management of the institutions
