Invexity and Optimization Shashi K. Mishra, Giorgio Giorgi, 2008-04-24 Invexity and Optimization presents results on invex function and their properties in smooth and nonsmooth cases pseudolinearity and eta pseudolinearity Results on optimality and duality for a nonlinear scalar programming problem are presented second and higher order duality results are given for a nonlinear scalar programming problem and saddle point results are also presented Invexity in multiobjective programming problems and Kuhn Tucker optimality conditions are given for a multiobjective programming problem Wolfe and Mond Weir type dual models are given for a multiobjective programming problem and usual duality results are presented in presence of invex functions Continuous time multiobjective problems are also discussed Quadratic and fractional programming problems are given for invex functions Symmetric duality results are also given for scalar and vector cases

Generalized Convexity and Vector Optimization Shashi K. Mishra, Shouyang Wang, Kin Keung Lai, 2008-12-19 The present lecture note is dedicated to the study of the optimality conditions and the duality results for nonlinear vector optimization problems in finite and infinite dimensions The problems include nonlinear vector optimization problems symmetric dual problems continuous time vector optimization problems relationships between vector optimization and variational inequality problems Nonlinear vector optimization problems arise in several contexts such as in the building and interpretation of economic models the study of various technological processes the development of optimal choices in finance management science production processes transportation problems and statistical decisions etc In preparing this lecture note a special effort has been made to obtain a self-contained treatment of the subjects so we hope that this may be a suitable source for a beginner in this fast growing area of research a semester graduate course in nonlinear programming and a good reference book This book may be useful to theoretical economists engineers and applied researchers involved in this area of active research The lecture note is divided into eight chapters Chapter 1 briefly deals with the notion of nonlinear programming problems with basic notations and preliminaries Chapter 2 deals with various concepts of convex sets convex functions invex set invex functions quasiinvex functions pseudoinvex functions type I and generalized type I functions V invex functions and univex functions
