Philosophical Papers and Letters G.W. Leibniz, 2012-12-06 The selections contained in these volumes from the papers and letters of Leibniz are intended to serve the student in two ways first by providing a more adequate and balanced conception of the full range and penetration of Leibniz s creative intellectual powers second by inviting a fresher approach to his intellectual growth and a clearer perception of the internal strains in his thinking through a chronological arrangement Much confusion has arisen in the past through a neglect of the develop ment of Leibniz s ideas and Couturat s impressive plea in his edition of the *Opuscu es et fragments* p xii for such an arrangement is valid even for incomplete editions The beginning student will do well however to read the maturer writings of Parts II III and IV first leaving Part I from a period too largely neglected by Leibniz criticism for a later study of the still obscure sources and motives of his thought The Introduction aims primarily to provide cultural orientation and an exposition of the structure and the underlying assumptions of the philosophical system rather than a critical evaluation I hope that together with the notes and the Index it will provide those aids to the understanding which the originality of Leibniz s scientific ethical and metaphysical efforts deserve
