Spectra of Symmetrized Shuffling Operators Victor Reiner, Franco Saliola, Volkmar Welker, 2014-03-05 For a finite real reflection group W and a W orbit O of flats in its reflection arrangement or equivalently a conjugacy class of its parabolic subgroups the authors introduce a statistic $\text{noninv } O w$ on w in W that counts the number of O noninversions of w This generalises the classical non inversion statistic for permutations w in the symmetric group S_n The authors then study the operator O of right multiplication within the group algebra CW by the element that has $\text{noninv } O w$ as its coefficient on w

Induction, Bounding, Weak Combinatorial Principles, and the Homogeneous Model Theorem Denis R. Hirschfeldt, Karen Lange, Richard A. Shore, 2017-09-25 Goncharov and Peretyatkin independently gave necessary and sufficient conditions for when a set of types of a complete theory is the type spectrum of some homogeneous model of Their result can be stated as a principle of second order arithmetic which is called the Homogeneous Model Theorem HMT and analyzed from the points of view of computability theory and reverse mathematics Previous computability theoretic results by Lange suggested a close connection between HMT and the Atomic Model Theorem AMT which states that every complete atomic theory has an atomic model The authors show that HMT and AMT are indeed equivalent in the sense of reverse mathematics as well as in a strong computability theoretic sense and do the same for an analogous result of Peretyatkin giving necessary and sufficient conditions for when a set of types is the type spectrum of some model

Relative Equilibria in the 3-Dimensional Curved n -Body Problem Florin Diacu, 2014-03-05 Considers the 3 dimensional gravitational n body problem $n \geq 2$ in spaces of constant Gaussian curvature $k \neq 0$ i.e. on spheres S^{n-1} for 0 and on hyperbolic manifolds H^{n-1} for $k < 0$

The Scientific Journal Alex Csiszar, 2018-06-25 Not since the printing press has a media object been as celebrated for its role in the advancement of knowledge as the scientific journal From open communication to peer review the scientific journal has long been central both to the identity of academic scientists and to the public legitimacy of scientific knowledge But that was not always the case At the dawn of the nineteenth century academies and societies dominated elite study of the natural world Journals were a relatively marginal feature of this world and sometimes even an object of outright suspicion The Scientific Journal tells the story of how that changed Alex Csiszar takes readers deep into nineteenth century London and Paris where savants struggled to reshape scientific life in the light of rapidly changing political mores and the growing importance of the press in public life The scientific journal did not arise as a natural solution to the problem of communicating scientific discoveries Rather as Csiszar shows its dominance was a hard won compromise

born of political exigencies shifting epistemic values intellectual property debates and the demands of commerce Many of the tensions and problems that plague scholarly publishing today are rooted in these tangled beginnings As we seek to make sense of our own moment of intense experimentation in publishing platforms peer review and information curation Csizar argues powerfully that a better understanding of the journal s past will be crucial to imagining future forms for the expression and organization of knowledge

The \$abc\$-Problem for Gabor Systems Xin-Rong Dai,Qiyu Sun,2016-10-05

A longstanding problem in Gabor theory is to identify time frequency shifting lattices $a\mathbb{Z} + b\mathbb{Z}$ and ideal window functions I on intervals I of length c such that $e^{2\pi i t m}$ $m \in \mathbb{Z}$ are Gabor frames for the space of all square integrable functions on the real line In this paper the authors create a time domain approach for Gabor frames introduce novel techniques involving invariant sets of non contractive and non measure preserving transformations on the line and provide a complete answer to the above abc problem for Gabor systems
