Road Pricing and Provision Michael de Percy, John Wanna, 2018-07-27 Road pricing is not a new concept toll roads have existed in Australia since Governor Macquarie established one from Sydney to Parramatta in 1811 and distance based charging schemes have been trialled and implemented with varying success overseas But how would full market reform of roads look in a federation like Australia In its responses to the 2016 Australian Infrastructure Plan and the 2015 Competition Policy Review the Australian Government explicitly supported investigating cost reflective road pricing as a long term reform option and has committed to establishing a study chaired by an eminent Australian to look into the potential impacts of road pricing reform on road users The challenges we face in this space are manifold and complex and we still have a long road ahead of us However with advocacy for reform coming from interest groups as diverse as governments private transport companies peak industry bodies policy think tanks and state motoring clubs there is now more support than ever before for changing the way we provide for and fund our roads This book seeks to advance the road reform agenda by presenting some of the latest thinking on road pricing and provision from a variety of disciplinary approaches researchers economists and public sector leaders It stresses the need for reform to ensure Australians can enjoy the benefits of efficient and sustainable transport infrastructure as our population and major metropolitan cities continue to grow Traffic congestion is avoidable but we must act soon The works presented here all point to the need for change the expertise and the technology are available and the various reform options have been mapped out in some detail It is time for the policy debate to shift to how rather than if road reform should progress

A Comparative Study of Islamic Finance in Australia and the UK Imran Lum, 2021-09-28 This book provides valuable insights into the practical challenges faced by the nascent Islamic finance industry and compares the Australian experience to developments in the UK It contributes to a greater understanding of how Muslims living as a minority in Australia and the UK negotiate Islamic doctrine in secular societies by focusing on one aspect of this negotiation namely the prohibition of rib There is little debate in the Islamic tradition on the prohibition of rib The differences however lie in the interpretation of rib and the question of how Muslims live in a society that is heavily reliant on interest and conventional banking yet at the same time adhere to Islamic guidelines Through the words of religious leaders Muslim professionals and university students Imran Lum provides real accounts of how Muslims in Australia and the UK practically deal with conventional banking and finance products such as home loans savings accounts and credit cards He also explores Muslim attitudes towards Islamic finance and queries whether religion is the sole determining factor when it comes to its uptake Drawing on his own unique experience as a practitioner responsible for growing an Islamic business in a conventional bank

Lum provides a firsthand account of the complexities associated with structuring Islamic finance products that are not only sharia compliant but also competitive in a non Muslim jurisdiction Using uk k bonds as a case study he highlights the tangible and non tangible barriers to product development such as tax and regulatory requirements and the rise of Islamophobia Combining academic and industry experience Lum unpacks the relationship of Islamic finance with Muslim identity construction in the West and how certain modalities of religiosity can lead to an uptake of Islamic finance while others can lead to its rejection

Free Speech After 9/11 Katharine Gelber,2016 The relationship between counter terrorism policy in liberal democratic countries and freedom of speech has never been more prominent than it is today Since the terrorist attacks of 2001 Western governments have made a distinct and deliberate move towards prevention as opposed to purely prosecution of terrorist crimes However in doing so they have reached far into the freedom of speech and as Katharine Gelber argues far further than many commentators have recognized Examining the United States the United Kingdom and Australia the book traces the significant shift in understandings of the appropriate parameters of freedom of speech and speech practices in the counter terrorism context which has been seen both in policy change and in the discursive justification for that change The book argues that this change has to some extent taken different forms in each jurisdiction which reflect the pre existing institutions within which the principle of freedom of speech was mediated in each country prior to 9 11

Sovereignty, Migration and the Law Patricia Rushton,2025-02-11 This book examines how states justify the creation of physical policy and legislative barriers of entry for migrants by drawing on a concept of sovereignty The movement of people across the world in search of refuge from persecution war and poverty is accelerating And as states confronted with this movement create physical policy and legislative barriers to entry they justify this exclusion by drawing on concepts of sovereignty This book interrogates that justification in an historical and theoretical context using the case study of Australian law and policy since 1900 as well as instances from other Western countries that have routinely copied from Australia But just as Australian migration policies are being replicated in the US Britain and Europe so this book argues is their employment of an anachronistic concept of sovereignty one that is reasserted precisely because of its waning power in the face of globalisation This book will be an important resource for law and political science scholars researchers and students in the fields of migration and refugee law and policy as well as to professional policy makers government institutions lawyers and international agencies with a particular focus on those fields
