Malaria Microscopy Quality Assurance Manual - Version 2 World Health Organization,2016-04-05 The first version of the WHO Malaria microscopy quality assurance manual 2009 was based on recommendations made at a series of informal consultations organized by WHO particularly a bi regional meeting of the WHO regional offices for South East Asia and the Western Pacific in April 2005 in Kuala Lumpur Malaysia followed by informal consultations held in March 2006 and February 2008 in Geneva Switzerland Subsequently extensive consultations among international malaria experts led to consensus and preparation of the manual This second version of the Manual is based on the recommendations of experts made at a WHO technical consultation in March 2014 in Geneva Switzerland The aim of the meeting was to review the experiences of national malaria control programmes NMCPs national reference laboratories NRLs and technical agencies in using the Manual and country experience in order to improve systems for managing the quality of malaria microscopy This second version takes into account the many years of experience of several agencies in the various aspects of quality assurance QA described in the Manual In particular the sections on assessment of competence in malaria microscopy are based on use of this method by the WHO regional offices for South East Asia and the Western Pacific in collaboration with the WHO Coordinating Centre for Malaria in Australia and by the WHO Regional Office for Africa in collaboration with Amref Health Africa The section on setting up and managing an international reference malaria slide bank is based on the work of the WHO Regional Office for the Western Pacific in collaboration with the WHO Coordinating Centre for Malaria Diagnosis in the Philippines The section on proficiency testing for malaria microscopy is based on work in the WHO Regional Office for Africa in collaboration with the National Institute for Communicable Diseases in South Africa and experience in regional initiatives by Amref Health Africa The section on slide validation is based on work by M decins sans Fronti res and the section on outreach training and supportive supervision OTSS is based on work by the President s Malaria Initiative Malaria Care Project Medical Care Development International and Amref Health Africa The Manual is designed primarily to assist managers of NMCPs and general laboratory services responsible for malaria control

The information is also applicable to nongovernmental organizations NGOs and funding agencies involved in improving quality management systems for malaria microscopy The Manual is not designed for QA of microscopy in research situations such as in clinical trials of new drugs and vaccines or for monitoring parasite drug resistance It forms part of a series of WHO documents designed to assist countries in improving the quality of malaria diagnosis in clinical settings including the revised training manuals on Basic malaria microscopy 2010 and the Bench aids for malaria microscopy 2010 *Ruppel's Manual of Pulmonary Function Testing - E-Book* Carl Mottram, 2013-08-09 New Bronchoprovocation chapter features important information on methacholine histamine mannitol exercise challenges and eucapnic voluntary hyperventilation New chapter on reference equations simplifies common reference equations and includes normal and abnormal values encountered in the clinical setting New How To boxes provide step by step guidelines to performing pulmonary function tests taking the guesswork out of completing accurate and result producing tests New NBRC CPFT mapping prepares you for the certified pulmonary function technologist credentialing examination correlating content to test items in the NBRC CPFT testing matrix New Clinical Scenario lecture slides provide in depth case analysis with figures charts lab values and documented research New author Carl Mottram a leading respiratory care expert who contributed to this book's previous two editions is the Technical Director of the Pulmonary Function Labs and Rehabilitation at the Mayo Clinic and is an Associate Professor of Medicine at the Mayo Clinic College of Medicine and a highly sought after lecturer at national and international symposiums and conferences

Laboratory Techniques in Thrombosis — a Manual J. Jespersen, R.M. Bertina, F. Haverkate, 2013-12-01 The first edition of this manual appeared in 1992 and was entitled ECAT Assay Procedures It was the result of a unique cooperation between experts brought together by the European Concerted Action on Thrombosis and Disabilities ECAT The Concerted Action was at that time under the auspices of the Commission of the European Union The second edition like the first edition deals with diagnostic tests within the field of thrombosis However the second edition has a broader scope because it is no longer limited by the frontiers of ECAT Experts all over the world in and outside ECAT have contributed to this edition The editors are very grateful for their contributions The need for a new edition is obvious Since 1992 new assays have been introduced for research diagnosis and therapy of thrombosis for other assays improvements have been suggested while a few others became redundant The editors waived the radioimmunoassays of thromboglobulin and platelet factor 4 due to the fact that the kits required for these assays are rarely or no longer available Also the PAI 1 activity assay was waived as it is liable to many inconsistencies and to large variations A list of names and addresses of manufacturers marketing the kits and reagents has been compiled together with a list of the recommended nomenclature of quantities in thrombosis and haemostasis in order to facilitate the use of the updated version These lists have been carefully compiled by Johannes J Sidelmann PhD Department of Clinical Biochemistry in Esbjerg Denmark
