Implementing a National Cancer Clinical Trials System for the 21st Century Institute of Medicine,Board on Health Care Services,National Cancer Policy Forum,2011-09-19

Clinical trials enable scientific discoveries to advance patient care in addition to informing and guiding subsequent research. The National Cancer Institute's NCI's Clinical Trials Cooperative Group Program works to advance patient care and research. The Cooperative Group Program has been instrumental in establishing the standards for cancer patient care and clinical research methods. Despite broad participation in the program, financial strain and procedural burdens limit the ability of the Cooperative Group Program to undertake medical practice changing clinical research. Thus, the Institute of Medicine's IOM's National Cancer Policy Forum and the American Society of Clinical Oncology held a workshop on March 21, 2011, to follow up on the 2010 IOM report *A National Clinical Trials System for the 21st Century*. Reinvigorating the NCI Cooperative Group Program, which made recommendations to strengthen the NCI Cooperative Group Program, in keeping with the established commitment to excellence. Implementing a National Cancer Clinical Trials System for the 21st Century outlines how to improve the current system by incorporating innovative science and trial design into cancer clinical trials. It also examines the impact of increasing quality in regards to speed, efficiency, design, launch, and conduct, as well as improving prioritization and incentivized participation.

Chronic Illness Care Timothy P. Daaleman, Margaret R. Helton, 2023-06-14. The second edition of this popular textbook provides a comprehensive overview to chronic illness care, which is the coordinated, comprehensive, and sustained response to chronic diseases and conditions by health care providers, formal and informal caregivers, health care systems, and community-based resources. This unique resource uses an ecological framework to frame chronic illness care at multiple levels and includes sections on individual influences, the role of family and community, networks, social and environmental determinants, and health policy. The book also orients how chronic care is provided across the spectrum of health care settings, from home to clinic, from the emergency department to the hospital, and from hospitals to residential care facilities. The fully revised and expanded edition of *Chronic Illness Care* describes the operational frameworks and strategies that are needed to meet the care needs of chronically ill patients, including behavioral health care, management transitions of care, and health information technology. It also addresses the changing workforce needs in health care and the fiscal models and policies that are associated with chronic care. Several new chapters are included in the second edition and reflect the significant changes that have occurred in health care due to the COVID-19 pandemic. Chapters covering vaccinations, virtual care, and care of COVID-19 associated chronic conditions have been added. The revised textbook builds on the first edition's content that covered providing care to special population groups such as children and adolescents, older adults, and adults with intellectual and developmental disabilities, by including care approaches to adults with severe and persistent mental health disorders, the LGBTQ community, incarcerated persons, immigrants and refugees, and military veterans. Finally, chapters on important and emerging topics such as natural language processing and health inequities and structural racism have also been added.

Dying in America Institute of Medicine, Committee on Approaching Death: Addressing Key End-of-Life Issues, 2015-03-19. For patients and their loved ones, no care decisions are more profound than

those made near the end of life Unfortunately the experience of dying in the United States is often characterized by fragmented care inadequate treatment of distressing symptoms frequent transitions among care settings and enormous care responsibilities for families According to this report the current health care system of rendering more intensive services than are necessary and desired by patients and the lack of coordination among programs increases risks to patients and creates avoidable burdens on them and their families Dying in America is a study of the current state of health care for persons of all ages who are nearing the end of life Death is not a strictly medical event Ideally health care for those nearing the end of life harmonizes with social psychological and spiritual support All people with advanced illnesses who may be approaching the end of life are entitled to access to high quality compassionate evidence based care consistent with their wishes Dying in America evaluates strategies to integrate care into a person and family centered team based framework and makes recommendations to create a system that coordinates care and supports and respects the choices of patients and their families The findings and recommendations of this report will address the needs of patients and their families and assist policy makers clinicians and their educational and credentialing bodies leaders of health care delivery and financing organizations researchers public and private funders religious and community leaders advocates of better care journalists and the public to provide the best care possible for people nearing the end of life
