Cash flow forecasting or cash flow management is a key aspect of financial management of a business, planning its future cash requirements to avoid a crisis of liquidity. Cash flow forecasting is important because if a business runs out of cash and is not able to obtain new finance, it will become insolvent. Cash flow is the life blood of all businesses, particularly start-ups and small enterprises. As a result, it is essential that management forecasts or predicts what is going to happen to cash flow to make sure the business has enough to survive.
