Eighteen Wheels North to Alaska Cliff Bishop, 2009-10-01 In spite of the obstacles the Alaska truckers were presented with they never weakened in their determination to get the job done These pioneer drivers never conquered or tamed Alaska's roads and weather but they learned to operate on the back

trails and paths always making their way to the trip's end. In spite of all the challenges they never quit. The following from Teddy Roosevelt is an appropriate salute to Alaskan truckers. It is not the critic who counts; not the man who points out how the strong man stumbles or where the doer of deeds could have done better. The credit belongs to the man who is actually in the arena, whose face is marred by dust and sweat and blood, who strives valiantly, who errs and comes up short again and again because there is no effort without error or shortcoming, but who knows the great enthusiasms, the great devotions, who spends himself for a worthy cause, who at the best knows in the end the triumph of high achievement and who at the worst, if he fails, at least he fails while daring greatly, so that his place shall never be with those cold and timid souls who knew neither victory nor defeat. **Eighteen Wheels North to Alaska** A History of Trucking in Alaska is the story of Alaskan drivers who guided, coaxed, pushed, pulled, plowed and somehow made it to the end of the road and beyond over high mountain passes, whiteout conditions, seventy below zero temperature, through mud, muck and tundra terrain even onto the Arctic Ocean ice beyond the shore.

Calculus I Jerrold Marsden, Alan Weinstein, 2012-12-06 The goal of this text is to help students learn to use calculus intelligently for solving a wide variety of mathematical and physical problems. This book is an outgrowth of our teaching of calculus at Berkeley and the present edition incorporates many improvements based on our use of the first edition. We list below some of the key features of the book. **Examples and Exercises** The exercise sets have been carefully constructed to be of maximum use to the students. With few exceptions we adhere to the following policies. The section exercises are graded into three consecutive groups: a) The first exercises are routine, modelled almost exactly on the examples; these are intended to give students confidence. b) Next come exercises that are still based directly on the examples and text but which may have variations of wording or which combine different ideas; these are intended to train students to think for themselves. c) The last exercises in each set are difficult. These are marked with a star and some will challenge even the best students. Difficult does not necessarily mean theoretical; often a starred problem is an interesting application that requires insight into what calculus is really about. The exercises come in groups of two and often four similar ones.
