How to Teach Maths Steve Chinn,2020-11-23 How to Teach Maths challenges everything you thought you knew about how maths is taught in classrooms Award winning author Steve Chinn casts a critical eye over many of the long established methods and beliefs of maths teaching Drawing from decades of classroom experience and research he shows how mathematics teaching across the whole ability range can be radically improved by learning from the successful methods and principles used for the bottom quartile of achievers the outliers Chinn guides readers through re adjusting the presentation of maths to learners considering learners needs first and explains the importance of securing early learning to create a conceptual foundation for later success This highly accessible book uses clear diagrams and examples to support maths teachers through many critical issues including the following The context of maths education today Topics that cause students the most difficulty Effective communication in the mathematics classroom Addressing maths anxiety The perfect resource for maths teachers at all levels this book is especially useful for those wanting to teach the foundations of mathematics in a developmental way to learners of all ages and abilities It has the potential to change the way maths is taught forever

Differentiated Instruction Around the World Verena Letzel-Alt,Marcela Pozas,2023-07-21 14 different countries various research methods 1 topic Differentiated Instruction With increasingly diverse student populations in schools the establishment of inclusive classrooms has become a top international priority Teachers around the world are urged to differentiate their instruction in order to support all students learning needs Although there is research on the topic there are still important gaps to explore especially the underrepresented international research output This book tackles such limitations and provides a first ever publication concerning global insights into differentiated instruction A total of 14 countries from 5 continents provide empirical evidence theoretical and practical approaches to the topic The book wraps up with a contribution from Prof Dr John Hattie University of Melbourne who shares eight theses to help the continuing debate and research on differentiated instruction

South African Schooling: The Enigma of Inequality Nic Spaull,Jonathan D. Jansen,2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of

teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI
