Long and Short Essay on Career

Career Essay 1 (200 words)

Choosing a career is a big decision and the irony is that we are not prepared to take such a big decision at the time we require taking it. We are still in our school when we have to choose between the science, commerce and humanities stream that mainly influences the career path we take up later. While earlier, it was parents, teachers and elder siblings who largely influenced our career choice, children these days have become more aware – thanks to the internet. We can explore the various available career options on the internet as well as their prospects before we make the final decision. However, advice from the elders is still recommended as they are more experienced. We must all be very careful while choosing our career. We must not enter a field just because our friend or sibling has taken it up or our parents want us to go for it. We should listen to our heart, understand what really interests us, see if we are good at it and then look forward to other aspects attached to it. The other aspects may include the cost involved in the course we wish to pursue, the demand of such professionals in the market, the packages being offered in the field we want to enter and the growth prospects in the field.

Career Essay 2 (300 words)

Introduction Be it a boy or a girl, these days career is given a lot of importance in a person's life. From the beginning itself, we are asked to concentrate on our studies and score well in the exams. The ultimate motif of doing this is to build a strong base and fetch good grades that would help you build a lucrative career. **My**

Career Plan I am from a well-learned family. Everyone in my family is working at good positions and thus there are high expectations from me too. My father is in the field of Information Technology and is working with a good multi-national company. My mother is a dentist. She has her own clinic which is well-established. My brother is currently studying medicine and aims to become a doctor. So, basically everyone in my family went for the science

stream. I am in 8th standard and would soon be required to decide as to which stream to go for. I have been performing consistently well in my exams and can easily enter the science stream. All my relatives, friends and family members also think that I will be choosing this field however I have a different plan. I want to become an interior designer. I am naturally inclined towards this field. It interests me immensely and I feel I can do really well in it. I love home décor items and love surfing through the internet and magazines to take a look at them. I also keep redecorating my room every now and then and am even appreciated for my unique ideas. I know this is my thing and I will flourish in this field. I am sure my family will respect my decision and encourage me to perform well in the field of my choice. **Conclusion** Choosing a career can be a challenging task. You must assess your skills and interest, study the market, and consult an experienced person before making the final decision.
