The addition of the personal experiences and reflections of 17 family life educators working in a variety of settings provides a meaningful context to the continuing evolution and importance of family life education in society. The authors incorporate theory, research, and practice while also providing guidelines for planning, implementing, and evaluating family life education programs. Content on sexuality education, relationship and marriage education, and parenting education highlights some of the more prevalent trends and visible forms of family life education. Scribner, 2016-05-12 Throughout the twentieth century, local control of school districts was one of the most contentious issues in American politics. As state and federal regulation attempted to standardize public schools, conservatives defended local prerogative as a bulwark of democratic values. Yet their commitment to those values was shifting and selective. In *The Fight for Local Control*, Campbell F. Scribner demonstrates how, in the decades after World War II, suburban communities appropriated legacies of rural education to assert their political autonomy and, in the process, radically changed educational law. Scribner's account unfolds on the metropolitan fringe where rapid suburbanization

overlapped with the consolidation of thousands of small rural schools Rural residents initially clashed with their new neighbors but by the 1960s the groups had rallied to resist government oversight What began as residual opposition to school consolidation would transform into campaigns against race based busing unionized teachers tax equalization and secular curriculum In case after case suburban conservatives carved out new rights for local autonomy stifling equal educational opportunity Yet Scribner also provides insight into why many conservatives have since abandoned localism for policies that stress school choice and federal accountability In the 1970s as new battles arose over unions textbooks and taxes districts on the rural suburban fringe became the first to assert individual choice in the form of school vouchers religious exemptions and a marketplace model of education At the same time they began to embrace tax limitation and standardized testing policies that checked educational bureaucracy but bypassed local school boards The effect Scribner concludes has been to reinforce inequalities between districts while weakening participatory government within them keeping the worst aspects of local control in place while forfeiting its virtues
