## **Good To Great :**

Good to Great Jim Collins, 2001 The Challenge Built to Last the defining management study of the nineties showed how great companies triumph over time and how long term sustained performance can be engineered into the DNA of an enterprise from the very beginning But what about the company that is not born with great DNA How can good companies mediocre companies even bad companies achieve enduring greatness The Study For years this question preyed on the mind of Jim Collins Are there companies that defy gravity and convert long term mediocrity or worse into long term superiority And if so what are the universal distinguishing characteristics that cause a company to go from good to great The Standards Using tough benchmarks Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years How great After the leap the good to great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years better than twice the results delivered by a composite index of the world's greatest companies including Coca Cola Intel General Electric and Merck The Comparisons The research team contrasted the good to great companies with a carefully selected set of comparison companies that failed to make the leap from good to great What was different Why did one set of companies become truly great performers while the other set remained only good Over five years the team analyzed the histories of all twenty eight companies in the study After sifting through mountains of data and thousands of pages of interviews Collins and his crew discovered the key determinants of greatness why some companies make the leap and others don't The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice The findings include Level 5 Leaders The research team was shocked to discover the type of leadership required to achieve greatness The Hedgehog Concept Simplicity within the Three Circles To go from good to great requires transcending the curse of competence A Culture of Discipline When you combine a culture of discipline with an ethic of entrepreneurship you get the magical alchemy of great results Technology Accelerators Good to great companies think differently about the role of technology The Flywheel and the Doom Loop Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap Some of the key concepts discerned in the study comments Jim Collins fly in the face of our modern business culture and will quite frankly upset some people Perhaps but who can afford to ignore these findings

*Good to Great* Jordan Baker,2015-12-15 Good to GreatBy Jim Collins Summary of the Key Ideas in 30 Minutes Or LessThe purpose of the act of writing good to great was to show that there were so many companies which got success in their specific industries within no time and within a specific time period Interestingly the writer found that there were eleven companies in total who became able to successfully match the criteria which has been mentioned before All of these eleven companies were then studied in deep sense and then comparisons were made in order to check how these are working not only by themselves but also with respect to their competitors So here in this book I am going to tell you the summary of tips which you can go through within half an hour along with the following important as aspects An introduction to the book

Lessons which you have got from book along with the summary of each chapter Key tips which are given by writer so that the organizations can go from good to great The key to success      *Summary Wisdom-Summary,2020-08-24* A Complete Summary of Good to Great Jim Collin s Good to Great examines companies that have not only endured over time but who managed the transition from being good companies to becoming outstanding performers The eleven companies found to have taken this leap managed to outperform the stock market 6 9 times over fifteen years The author set out to understand what distinguished great organizations from a carefully selected group of companies that did not make the grade The research team came up with some unexpected outcomes At the time of the transition from Good to Great all eleven companies were being led by Level 5 Leaders These people showed a unique combination of humility and professional will They were prepared to do anything necessary for the benefit of the organization Level 5 Leaders started out not by plotting the direction of the company but by ensuring that they had all the right people in the right positions Then they confronted the brutal facts of their organization and used this knowledge to ensure that they chose the right direction for the firm Knowing what the organization should be doing and equally importantly what it should not be doing they stuck stubbornly to the plan even when they were in dire circumstances The culture of discipline within the organization ensured that the path to excellence would eventually be met Patience endurance and discipline doggedly sticking only to what the company did best resulted in outstanding results This investigation of what distinguished the great from the mediocre is an excellent study of what is needed to build great organizations Here Is A Preview Of What You Will Get In Good to Great you will get a full understanding of the book In Good to Great you will get some fun multiple choice quizzes along with answers to help you learn about the book Get a copy and learn everything about Good to Great      [Good to Great in 15 Minutes: Key Takeaways and Analysis of the #1 Best Seller!](#) BigRead Reviewers,2015-07-18 Inside this book you will find all the essential key points of the The 1 Best Seller Good to Great Why Some Companies Make the Leap And Others Don t PLEASE NOTE This is an unofficial summary and analysis of the book and NOT the original book Read the official description of the book The Challenge Built to Last the defining management study of the nineties showed how great companies triumph over time and how long term sustained performance can be engineered into the DNA of an enterprise from the very beginning But what about the company that is not born with great DNA How can good companies mediocre companies even bad companies achieve enduring greatness The Study For years this question preyed on the mind of Jim Collins Are there companies that defy gravity and convert long term mediocrity or worse into long term superiority And if so what are the universal distinguishing characteristics that cause a company to go from good to great The Standards Using tough benchmarks Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years How great After the leap the good to great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years better than twice the results delivered by a composite

index of the world's greatest companies including Coca Cola, Intel, General Electric and Merck. The Comparisons: The research team contrasted the good to great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness: why some companies make the leap and others don't. The Findings: The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept: Simplicity within the Three Circles. To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good to great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. Some of the key concepts discerned in the study.
