Walter, 2021-07-15 This book presents the results of a series of literacy experiments in ten Niger Congo languages representing four language families and spanning five countries It asks the research question To what extent does full tone marking contribute to oral reading fluency comprehension and writing accuracy and does that contribution vary from language to language One of the main findings is that the ethno literacy profile of the language community and the social profile of the individual are stronger predictors of reading and writing performance than are the linguistic and orthographic profiles of the language Our data also suggest that full tone marking may be more beneficial for less educated readers and those with less experience of L1 literacy The book will bring practical help to linguists and literacy specialists in Africa and beyond who are helping to develop orthographies for tone languages It will also be of interest to cognitive psychologists exploring the reading process and researchers investigating writing systems      Training Readers and Writers for a

Multimodal and Multimedia Society: Cognitive Aspects Ester Trigo-Ibanez, Inmaculada Clotilde Santos Diaz, Marcela Jarpa, 2024-02-07 Contemporary societies have been advancing gradually towards the construction of a model of a literate population. Significant efforts have been made so that most citizens can access various sources today using their reading and writing abilities but are we really prepared to face the information age? Is information literacy being promoted from schools? Are individual capabilities being considered? Do we have a true critical literacy? This article collection aims to show an overview of the most recent research ranging from the individual to the collective from the subject's competencies and their beliefs to the way to develop them from school. There is room in this Research Topic for investigations belonging to the linguistic, psychological and didactic field. This Research Topic aims to address a pressing problem in contemporary world societies. It is proposed to offer various contributions related to critical literacy in general and reading and writing. In this sense, research that addresses analog and digital reading writing processes, academic literacy and the use of resources such as non-fiction illustrated books to develop critical thinking will be welcome. But also and in a very important way the cognitive processes of the subject will be considered not only to deal with access to information but also in the construction of their mental lexicon, an issue that offers the vision of the world of those who are immersed in literacy and in the post truth era.

**Reading-Writing Connections** Rui A. Alves, Teresa Limpo, R. Malatesha Joshi, 2020-06-02 This book shows that reading writing is a two way street that is burgeoning with research activity. It provides a comprehensive and updated view on reading writing connections by drawing on extant research and findings. It puts forward a new conception of literacy, one that establishes reading and writing connections as the primeval ground for building literacy science. It shows how an integrative view of literacy can have deep and lasting effects on conceptualizing literacy development in several orthographies and on improving literacy instruction and remediation worldwide. The book examines in detail such issues as modeling approaches to reading writing relations, literacy development, reading and spelling across orthographies and integrative approaches to literacy instruction and remediation.
