Papers, 1919 International Handbook of Mathematical Learning Difficulties Annemarie Fritz, Vitor Geraldi Haase, Pekka Räsänen, 2019-01-30 This comprehensive volume provides teachers researchers and education professionals with cutting edge knowledge developed in the last decades by the educational behavioural and neurosciences integrating cognitive developmental and socioeconomic approaches to deal with the problems children face in learning mathematics The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades but the most part of this research has been conducted in non applied settings and there s still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings Now it s time to bring the results from the laboratory to the classroom Apart from bringing the theoretical discussions to educational settings the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments It also provides insights to translate research knowledge into public policies in order to address socioeconomic issues And it does so from an international perspective dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world All of this makes the International Handbook of Mathematical Learning Difficulties an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society

Elusive Equity Edward B. Fiske, Helen F. Ladd, 2004-07-29 Elusive Equity chronicles South Africas efforts to fashion a racially equitable state education system from the ashes of apartheid Edward Fiske and Helen Ladd draw on previously unpublished data interviews with key officials and visits to dozens of schools to describe the changes made in school finance teacher assignment policies governance curriculum higher education and other areas

Education and the working class Sigamoney Manicka Naicker, 2024-07-12 Why do so many working class and vulnerable children struggle in the education system Education and the Working Class argues that education remains centred on a middle class narrative that ignores the lived realities of the poor and marginalised We dissect how a lack of sociological perspective and commitment to social justice has perpetuated an inflexible system that is failing vulnerable communities This book provides a cutting analysis of why interventions have failed to solve various issues and explores the limitations of special education and current inclusive policies The bureaucracy itself

is scrutinised calling for reformed teams combining disciplinary knowledge and project management skills Ultimately a new social justice model is proposed for education planning This would entail systemic changes like reworking the foundation phase around socio emotional development embracing contextual realities and compensating for the lack of social cultural capital Featuring insights from theorists like Bernstein and Bourdieu alongside the author s own writings and speeches the book initiates a vital debate It envisions transforming education to empower rather than marginalise the working class through a transformative philosophy grounded in their unique needs and circumstances

Physical Education and Physical Culture in South Africa, 1837-1966 Francois
Johannes Cleophas,2024-10-17 The interconnectedness between sport and colonialism has long been a matter of interest to sport historians Consequently a large number of scholarly works exist on physical education and physical culture history but there is no significant work on this within a South African context both nationally and at community level This book therefore provides the first historical account of physical education and physical culture in Cape Town South Africa and its surrounding areas in the Western Cape

Language of Instruction in Tanzania and South Africa - Highlights from a Project ,2010-01-01
This book is based on chapters in a series of four books from the first five years 2002 2006 of the Language of Instruction in Tanzania and South Africa LOITASA project LOITASA is a NUFU funded Norwegian University Fund project which began in January 2002 and will continue through to the end of 2011 The chapters reflect the state of the research at the end of the first five years of LOITASA in 2006 and were selected by reviewers independent of the project The selection of chapters brought together bring to the forefront the dilemmas facing developing countries as they seek to position themselves in an increasingly interconnected global system while at the same time maintaining a sense of national and regional identity The chapters in this collection reflect both positive outcomes when the medium of instruction is a widely known language as well as the challenges of mother tongue instruction in countries where historically a powerful language like English has dominated The four LOITASA books in this series from which the chapters in this book are drawn are Language of instruction in Tanzania and South Africa LOITASA published by E Zubeida Desai the South African project leader and Martha Qorro who is on the project steering committee in Tanzania

Innovations in online teaching and learning Judah P.
Makonye,Nokulunga S. Ndlovu,2023-03-01 This book s research is on online pedagogical approaches devised by teacher educators and researchers to circumvent a face to face curriculum delivery during the COVID 19 pandemic The challenge faced by educators was that they were uncertain of how to use digital technologies in teaching learning and assessment productively This book reports on case studies on teaching student teachers with technology in a way that advanced not only communication but also the cognitive growth of students in relation to disciplinary knowledge The scholars from South African universities used both conceptual and empirical methodologies mostly in qualitative set ups The scholarly

contributions in this book are varied They cover theoretical nuances for ICT use in education considerations for the use of computers in the classroom pedagogical thinking and pedagogical integration of ICTs in education affordances of iPads in visible teaching and learning supporting student cognition in Languages Mathematics Science Engineering Graphics and Design with ICTs The use of software applications such as GeoGebra and Excel in teaching and learning mathematics is researched among others The rich discussions that emerged from their research enable academics to learn from others innovative moments that came as a result of pandemic pressure The recommendations in this book can be used in blended learning beyond the COVID 19 era as curriculum delivery methods are bound to change The value of this book is that it reports on pedagogical innovations in using digital technologies in teacher education Researchers have an opportunity to learn from this book how to deal with the tantalising teaching and learning problem of our time How can the use of digital technology transform teaching and learning in general and teacher education in particular
