S. Morin,Christophe Maïano,Danielle Tracey,Rhonda G. Craven,2017-03-01 Increasing numbers of children and adolescents internationally are being diagnosed with secondary health problems e g overweight obesity diabetes asthma anxiety etc due in part or at least related to a lack of physical activity Children and adolescents with various forms of special needs for example children and adolescents with physical or intellectual disabilities children and adolescents from disadvantaged social backgrounds and children and adolescents with chronic illnesses seem to be particularly at risk for secondary health problems which in the end limit their social participation and inclusion as well as their ability to achieve their full potential and to lead happy and fulfilling lives For these children and adolescents involvement in regular physical activities including fitness activities and sports may have far reaching benefits For instance organized physical activities are known to represent an effective vehicle for interventions for children and adolescents with special needs who do not seem to benefit as much as others from more traditional verbal oriented approaches Organized physical activities in or out of school further provide these children and adolescents with opportunities to interact in a positive manner with prosocial peers and adults who may serve as positive role models for them There is currently a paucity of research about physical activities that effectively include children and adolescents with a range of special needs or research that identifies evidence based strategies that seed success in maximizing the involvement in and the positive biopsychosocial outcomes associated with the practice of physical activity This dearth of research is impeding progress in addressing the biopsychosocial disadvantage that these children and adolescents encounter the development of

new solutions for enabling full potential and ensuring that children and adolescents with special needs not only succeed but also flourish in life This volume includes examples of theory research policy and practice that will advance our understanding of how best to encourage these children and adolescents to participate regularly in physical activity how to maximize the biopsychosocial benefits of involvement in physical activities and how to ensure that these physical activities are inclusive for children and adolescents with special needs The focus will be placed on research derived physical activity practices that seed success for children and adolescents with special needs and new directions in theory research and practice that have implications for enhancing physical activity practices with at risk children and adolescents The themes covered in this volume include Strategies to maximise participation of children and adolescents with special needs in physical activity as a global priority Strategies to maximise the social inclusion of children and adolescents with special needs in general physical activities Effective physical education strategies to enhance biopsychosocial outcomes for children and adolescents with special needs Advancing the practice of educators and coaches to cultivate the social inclusion and participation in physical activity of children and adolescents with special needs and Challenging the meaning and implementation of inclusive practices in physical education globally

Impact of Diversity on Organization and

Career Development Hughes, Claretha, 2014-11-30 Today's workforce represents individuals of various backgrounds and experiences. The influence of such individuals is becoming an important component in the workplace and researchers continue to explore the challenges of understanding the connection between employee profiles and the overall success of a company. Impact of Diversity on Organization and Career Development brings together a reflective discussion on the previous approaches and strategies of companies in relation to the paradigm shift in workplace equity of today's workforce. By examining both old and new strategies, the research included in this publication will present a unique approach for future company enhancement and employee success. This publication is an essential reference source for researchers, practitioners, managers, and students interested in the effects of multicultural representation on both a company and its employees through professional growth and advancement.

Big Picture Pedagogy: Finding Interdisciplinary Solutions to Common Learning Problems Regan A. R. Gurung, David J. Voelker, 2017-10-02 Take a big picture look at teaching and learning. Building on existing pedagogical research, this volume showcases the scholarship of teaching and learning (SoTL) across the disciplines and takes it in a new direction. In each chapter, interdisciplinary teams of authors address a single pedagogical question, bringing each of their home disciplines' specific literature and methodologies to the table. The result is a fresh examination of evidence-based practices for teaching and learning in higher education that is intentionally inclusive of faculty from different disciplines. By taking a closer, more systematic look at the pedagogies used within the disciplines and their impacts on student learning, the authors herein move away from more generic teaching tips and generic classroom activities and toward values, knowledge, and manner of thinking within SoTL itself. The projects discussed in each chapter furthermore will provide models for further research via interdisciplinary collaboration. This is the 151st volume of this Jossey-Bass higher education series. It offers a comprehensive range of ideas and techniques for improving college teaching based on the experience of seasoned instructors and the latest findings of educational and psychological researchers.

Teaching for Learning and Learning for Teaching Christopher Klopfer, Steve Drew, 2015-10-30 Teaching for Learning and Learning for Teaching focuses on the emerging global governmental and institutional agenda about higher education teaching quality and the role that peer review can play in supporting improvements in teaching and student outcomes. This agenda is a pervasive element of the further development of higher education internationally through activities of governments, global agencies, institutions of higher education, discrete disciplines, and individual teachers. Many universities have adopted student evaluations as a mechanism to appraise the quality of teaching. These evaluations can be understood as providing a customer-centric portrait of quality, and when used as the sole arbiter of teaching performance, they do not instill confidence in the system of evaluation by academic teaching staff. Providing peer perspectives as counterpoint, whether in a developmental or summative form, goes some way to alleviating this imbalance and is the impetus for the resurgence of interest in peer review and observation of teaching. This book seeks to recognise cases of peer review of teaching in Higher Education to affirm best

practices and identify areas that require improvement in establishing local national and international benchmarks of teaching quality

Developing Thinking and Understanding in Young Children Sue Robson, 2019-09-10

The third edition of this essential book presents a comprehensive and accessible overview of contemporary theory and research about young children's developing thinking and understanding. Sue Robson's detailed exploration of the ideas and theories is enlivened by transcripts of children's activities and conversations taken from practice and contemporary research, helping readers to make links between theory, research and practice. This new edition brings together up to date research into neuroscience and digital learning, combining theory with discussions for best practice. Each chapter also includes ideas for further reading and suggested activities. Key chapters explore the following:

- Theories of cognitive development
- The social, emotional and cultural contexts of children's thinking
- Developments in brain science and young children
- The central roles of play and language in young children's developing thinking
- Children's conceptual development
- Visual thinking and thinking in music

This book is crucial reading for all those interested in how young children develop through their thoughts and actions, including students of Early Years studies, teachers and early years practitioners.
