Resources in Education ,2001-10 *The Armed Forces Covenant in action?* Great Britain: Parliament: House of Commons: Defence Committee,2013-07-18 A series of Ofsted inspections on Army Apprenticeships conducted in 2013 rated the overall effectiveness as good This was an improvement over the last inspection in 2009 rated as satisfactory now called requires improvement Some 28 per cent of Army recruits were less than 18 years of age Further information is needed on why the Army is so dependent on recruiting personnel under the age of 18 years compared to the other two Services and whether steps are being taken to reduce this dependency Of those recruited in 2012 3 5 per cent of the Army were rated at entry level 2 for literacy that of a 7 to 8 year old and 39 per cent had a literacy level of an eleven year old If as the MoD states it has to recruit personnel at whatever level of attainment is available then it should boost remedial action when recruitment entry standards are particularly low In light of changes brought about by Future Force 2020 it may be that recruiting personnel with higher levels of attainment would better meet the future needs of the Armed Forces Whilst the Committee recognises that some recruits may not be eager to take further academic exams the MoD should encourage more recruits to undertake English and Maths GCSEs which would stand them in good stead for future employment The MoD has carried out some useful pilot projects with paramedic training and should identify more potential projects to ensure that vital skills paid for by the MoD are not lost to the country Teaching Mathematics Creatively Linda Pound,Trisha Lee,2021-09-30 This revised and updated third edition offers a range of strategies activities and ideas to bring mathematics to life in the primary classroom Taking an innovative and playful approach to maths teaching this book promotes creativity as a key element of practice and offers ideas to help your students develop knowledge understanding and enjoyment of the subject In the creative classroom mathematics becomes a tool to build confidence develop problem solving skills and motivate children The fresh approaches explored in this book include a range of activities such as storytelling music and construction elevating maths learning beyond subject knowledge itself to enable students to see mathematics in a new way Key chapters of this book explore Learning maths outdoors make more noise make more mess or work on a larger scale Everyday maths making sense of the numbers patterns shapes and measures children see around them Music and maths the role of rhythm in learning and music and pattern in maths Stimulating accessible and underpinned by the latest research and theory this is essential reading for trainee and practising teachers who wish to embed creative approaches to maths teaching in their classroom **Early mathematics counts** Yasmin A Sitabkhan,Linda Platas,2018-07-23 This occasional paper examines common instructional strategies in early grade mathematics interventions through a review of studies in classrooms in low and middle income countries Twenty four studies met the criteria for inclusion and analyses reveal four sets of instructional strategies for which there is evidence from multiple contexts Of the 24 studies 16 involved the use of multiple representations 10 involved the use of developmental progressions 6 included supporting student use of explanation

and justification and 5 included integration of informal mathematics Based on the review we provide conclusions and recommendations for future research and policy Daily Graphic Yaw Boadu-Ayeboafah,2006-06-07 **Resources in Education** ,1997 **Primary Education in Crisis** Brahm Fleisch,2008 In the past decade the national preoccupation has been on the crisis in secondary schools Lurking behind the intractable problem of low pass rates the dysfunctional schools and the small number of higher grade mathematics and science graduates is the calamity in primary education Drawing on the work of researchers in a range of fields including psychology sociology anthropology linguistics economics the health sciences and mathematics education this book documents the depth and scope of the primary education crisis and provides a comprehensive and rigorous explanation of its causes Primary education in crisis pulls together the wealth of research on health poverty resources language and teaching as factors in academic achievement in reading writing and mathematics At the centre of the book is an analysis of the published studies that systematically document what teachers teach and fail to teach and why it is that teaching is at the heart of the crisis in primary education The author suggests that there are no quick fixes but only hard choices and that for reform to succeed it must be evidence based *International Comparative Studies in Mathematics* Jinfa Cai,Ida A.C. Mok,Vijay Reddy,Kaye Stacey,2016-08-20 It argues that the main purpose of educational research is to improve student learning and that international comparative studies are no exception British Education Index ,2005 **HLP 120 - Overlooked and Left Behind: Improving the Transition from School to Work for the Majority of Young People** The Stationery Office,2016 The transition from school into work is a vital point in the lives of young people Making a successful transition through a high quality and valued pathway can mean a successful career Becoming trapped in poor quality and under valued alternatives can mean a lifetime of poverty This report is about young people and social mobility and focuses on how to ensure that all young people are offered a high quality career path after they leave school We have found that the current policy structure means a large number of young people do not have good options and are not supported to make a choice which works for them and is successful An increasing number of young people leave school and go on to A Levels and university Of the others a small minority are at risk of dropping out of education employment or training the NEETS Successive governments have focused on these two groups for a long time But the majority of young people in the UK do not fall into either group They do not go to university they find jobs or they continue with some form of vocational education Despite making up the majority of the emerging workforce they have received much less attention It is these young people who are the focus of this report The current system for young people who do not follow an academic route is complex and incoherent with confusing incentives for young people and employers Careers advice and education are being delivered in a way which means that too many young people simply drift into further studies or their first job which often has no real prospect of progression **Complete Book of Colleges, 2005 Edition** Princeton Review (Firm),2004-07-20 Up to date information on 1 780 colleges and universities Understanding Learning
