McDevitt, Jeanne Ellis Ormrod, Glenn Cupit, Margaret Chandler, Valarie Aloa, 2012-08-21 *Child Development and Education* is a comprehensive child development text written especially for educators. It helps students to translate developmental theories into practical implications for teaching and caring for youngsters with diverse backgrounds, characteristics, and needs. The text draws from innumerable theoretical concepts, research studies conducted around the world, and the authors' own experiences as parents, teachers, psychologists, and researchers to identify strategies for promoting young people's physical, cognitive, and social emotional growth. In this Australian edition, contemporary Australian and New Zealand research has been highlighted, and local educational structures, philosophies, and controversies have been reflected. *How People Learn II* National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Science Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on How People Learn II: The Science and Practice of Learning, 2018-10-27 There are many reasons to be curious about the way people learn, and the past several decades have seen an explosion of research that has important implications for individual learning, schooling, workforce training, and policy. In 2000, *How People Learn: Brain, Mind, Experience, and School* (Expanded Edition) was published, and its influence has been wide and deep. The report summarized insights on the nature of learning in school-aged children, described principles for the design of effective learning environments, and provided examples of how that could be implemented in the classroom. Since then, researchers have continued to investigate the nature of learning and have generated new findings related to the neurological processes involved in learning, individual and cultural variability related to learning, and educational technologies. In addition to expanding scientific understanding of the mechanisms of learning and how the brain adapts throughout the lifespan, there have been important discoveries about influences on learning, particularly sociocultural factors and the structure of learning environments. *How People Learn II: Learners, Contexts, and Cultures* provides a much-needed update incorporating insights gained from this research over the past decade. The book expands on the foundation laid out in the 2000 report and takes an in-depth look at the constellation of influences that affect individual learning. *How People Learn II* will become an indispensable resource to understand learning throughout the lifespan for educators of students and adults.
