A History of Human Rights Society in Singapore

Jiyoung Song, 2017-05-08 To celebrate Singapore's fiftieth anniversary for its independence from Malaysia in 1965, 35 students, academics and activists came together to discuss and write about pioneering Singaporean human rights activists and their under-reported stories in Singapore. The city state is known for its remarkable economic success while having strict laws on individual freedom in the name of national security, public order and racial harmony. Singapore's tough stance on human rights however does not negate the long and persistent existence of a human rights society that is little known to the world until today. This volume composed of nine distinctive chapters records a history of human rights activists, their campaigns, main contentions with the government, survival strategies and other untold stories in Singapore's first 50 years of state building. CTET Success Master Paper 1 for Class 1 to 5 for 2021 Exams Arihant Experts [Author], **Language, Cognition and Gender** Alan Garnham, Jane Oakhill, Lisa von Stockhausen, Sabine Sczesny, 2016-08-08 Gender inequality remains an issue of high relevance and controversy in society. Previous research shows that language contributes to gender inequality in various ways. Gender-related information is transmitted through formal and semantic features of language such as the grammatical category of gender through gender-related connotations of role names (e.g. manager, secretary) and through customs of denoting social groups with derogatory vs. neutral names. Both as a formal system and as a means of communication, language passively reflects culture-specific social conditions. In active use, it can also be used to express and potentially perpetuate those conditions. The questions addressed in the contributions to this *Frontiers Special Topic* include how languages shape the cognitive representations of gender, how features of languages correspond with gender equality in different societies, how language contributes to social behaviour towards the sexes, how gender equality can be promoted through strategies for gender-fair language use. These questions are explored both developmentally across the life span from childhood to old age and in adults. The contributions present work conducted across a wide range of languages including some studies that make cross-linguistic comparisons. Among the contributors are both cognitive and social psychologists and linguists, all with an excellent research standing. The studies employ a wide range of empirical methods from surveys to electro-physiology. The papers in the *Special Topic* present a wide range of complementary studies which will make a substantial contribution to understanding in this important area. *Outclassed* Joan C. Williams, 2025-05-20 An eye-opening, urgent call to mend the broken relationship between college and non-college grads of all races that is driving politics to the far right in the US. Is there a single change that could simultaneously protect democracy, spur progress on climate change, enact sane gun policies and improve our response to the next pandemic? Yes, changing the class dynamics driving American politics. The far right manipulates class anger to undercut progressive goals and liberals often inadvertently play into their hands. In *Outclassed* Joan C. Williams explains how to reverse that process by bridging the diploma divide while maintaining core progressive values. She offers college-educated Americans insights into how their values reflect their lives and their lives reflect their privilege. With illuminating stories from the Portuguese admiral who led that country's COVID response to the

lawyer who led the ACLU's gay marriage response and more Williams demonstrates how working class values reflect working class lives Then she explains how the far right connects culturally with the working class deftly manipulating racism and masculine anxieties to deflect attention from the ways far right policies produce the economic conditions disadvantaging the working class Whether you are a concerned citizen committed to saving democracy or a politician or social justice warrior in need of messaging advice Outclassed offers concrete guidance on how liberals can forge a multi racial cross class coalition capable of delivering on progressive goals *Handbook of Research on Investigations in Artificial Life Research and Development* Habib, Maki, 2018-06-08 Research on artificial life is critical to solving various dynamic obstacles individuals face on a daily basis From electric wheelchairs to navigation artificial life can play a role in improving both the simple and complex aspects of civilian life The Handbook of Research on Investigations in Artificial Life Research and Development is a vital scholarly reference source that examines emergent research in handling real world problems through the application of various computation technologies and techniques Examining topics such as computational intelligence multi agent systems and fuzzy logic this publication is a valuable resource for academicians scientists researchers and individuals interested in artificial intelligence developments
