introduction sets the scene for the remainder of the book by considering first the international context of widespread concern about the improvement of numeracy skills This is related to reform movements in the United Kingdom the United States and other countries aimed at modernising primary elementary school mathematics curricula A detailed account is given of the National Numeracy Strategy in England a systemic government imposed response to concern about standards implemented in 1999 2000 This includes a discussion of the alternative meanings of numeracy An earlier initiative sponsored by a United Kingdom charitable trust reacting to concern about primary numeracy was the Leverhulme Numeracy Research Programme This large scale longitudinal study and linked set of case study projects focusing on reasons for low attainment took place during 1997 2002 This book and each other in the same series is based on results of that research The timescale fortuitously enabled the research team to also report on some effects of the systemic reform in the National Numeracy Strategy

1 THE INTERNATIONAL CONTEXT

In many countries there are recurring periods of national concern about the low standards of calculation skills shown by children in primary elementary schools Recently these concerns have become more urgent and more political with the publication of international comparisons of mathematical achievement first at secondary and more recently at primary level e g Lapointe Mead Mullis et al 1997

Imprimitive Irreducible Modules for Finite Quasisimple Groups Gerhard Hiss, William J. Husen, Kay Magaard, 2015-02-06 Motivated by the maximal subgroup problem of the finite classical groups the authors begin the classification of imprimitive irreducible modules of finite quasisimple groups over algebraically closed fields K A module of a group G over K is imprimitive if it is induced from a module of a proper subgroup of G The authors obtain their strongest results when $\text{char } K = 0$ although much of their analysis carries over into positive characteristic If G is a finite quasisimple group of Lie type they prove that an imprimitive irreducible KG module is Harish Chandra induced This being true for $\text{rm char } K$ different from the defining characteristic of G the authors specialize to the case $\text{char } K = 0$ and apply Harish Chandra philosophy to classify irreducible Harish Chandra induced modules in terms of Harish Chandra series as well as in terms of Lusztig series The authors determine the asymptotic proportion of the irreducible imprimitive KG modules when G runs through a series groups of fixed twisted Lie type One of the surprising outcomes of their investigations is the fact that these proportions tend to 1 if the Lie rank of the groups tends to infinity For exceptional groups G of Lie type of small rank and for sporadic groups G the authors determine all irreducible imprimitive KG modules for arbitrary characteristic of K
