It also examines what assistance is provided by the administrators. The study was conducted in two National High Schools in the Philippines for the school year 2015-2016. This study used descriptive research design which employed the mixed method using questionnaire which was substantiated with the semi-structured interview and focus group discussion. The findings revealed that the teachers have high expectations particularly on the assessment of learning, teaching strategies, benefits to learners, nature of the curriculum and teaching approaches for the Grade 7 Science in the K-12 Basic Education Curriculum. The teachers were mostly challenged in developing instructional materials, providing activities that would master the competencies or skills of the learners, disciplining learners and making remedial activities. The Grade 7 Science Teachers encountered problems with learners who do not submit written outputs, students' difficulty in expressing their ideas, they do not bring materials for the experiment and they lack competence in teaching the core subjects. The Administrators provided assistance to the Grade 7 Science Teachers by sending the said teachers to training and seminar, providing them with worksheets on various science activities from LRMSDS Website, internet and in the production of test papers for the summative test. Handbook for Educating Students with Disabilities Jeffrey P. Bakken, 2025-09-16 This Handbook focuses on the implications and strategies for educating students with disabilities. Covering diverse populations from an academic, behavioral and international standpoint, it is a comprehensive resource spanning elementary to high school. In the first section, the Handbook delves into students with learning disabilities, autism and emotional behavioral disorders. The second section deals with students that have intellectual disabilities or extensive support needs. The third section concentrates on students with sensory disabilities. The fourth section addresses disabled youth and ways of knowing how to inform strategies in special education. The fifth and final section explores how teachers, parents and related personnel impact special education and services for these students. Extensive in its coverage of different disability areas, the content is both informative and innovative, offering invaluable insights. The Handbook draws from a mix of national and international perspectives, making it an indispensable guide for anyone engaged in the critical area of special education. **Studied Ignorance** Herbert N. Foerstel, 2013-05-23 Despite concerted efforts from our educators, administrators and government, American education continues to struggle. The author of this work argues that the decline can be traced to censored curricula, inaccurate

textbooks test driven evaluations and increasing poverty among the student population Under the definition of failure specified in the No Child Left Behind Act more than 80 percent of American schools could currently be labeled as failing while the quality of American education overall and our students performance continue to rank unfavorably against international competition This book examines the crisis in American education and identifies how weaknesses in textbooks teaching and testing have created the crisis facing American education a topic that dramatically affects students teachers and parents Author Herbert N Foerstel exposes the textbook wars that began a century ago and rage on with even more venom today His book traces the legal basis for curricular censorship that dates back 75 years identifies the bizarre process by which shoddy textbooks have been written published and come to be widely accepted and documents the disastrous effect that reliance on these materials has had on the curriculum Foerstel also supplies a careful assessment of the current political debate over education reform and of the proposed solutions to these problems
