SHERGILL,2010-05-25 Designed for the undergraduate students of psychology this comprehensive text presents the fundamental principles and concepts of psychology It discusses in detail various human behavioural patterns The book describes the nature goals and different schools of psychology It explains various methods of psychological research such as experimental observation interview questionnaire and case study methods Besides describing the biological bases of human behaviour it examines different types of psychological tests which are conducted to differentiate one individual from another This student friendly book also elaborates the processes of learning and memory the nature and types of memory and other important aspects of human behaviour such as motivation emotion and intelligence The James Lange and Cannon Bard theories of emotion psychometric theory and cognitive theory of intelligence are also thoroughly dealt with Finally different concepts of personality and techniques of assessment of personality are explained Key Features Includes a number of figures and illustrations to clarify the concepts Gives interesting facts and health tips Provides chapter end exercises for practice Offers several examples for easy understanding of the subject matter Social Justice, Multicultural Counseling, and Practice

Heesoon Jun,2010 This book takes a new approach to teaching students to think and learn about issues of race and diversity It aims to break down the traditional categorizations of racial ethnic groupings and focuses on teaching students to think and learn in a multidimensional manner rather than in a linear fashion The key to the book lies in its aim to teach students to practise culturally competent counselling by taking into consideration a client's multiple identities such as a middle aged African American woman who might be facing issues due to her racial grouping her age and her gender The book is filled with activities exercises and examples that help students think about racism in a non traditional manner rather than the typical ways often taught making it very timely and reflecting the transformation of thinking that is occurring in the field *Self, Logic, and Figurative Thinking* Harwood Fisher,2008-12-31 Harwood Fisher argues against neuroscientific and cognitive scientific explanations of mental states for they fail to account for the gaps between actions in the brain cognitive operations linguistic mapping and an individual's account of experience Fisher probes a rich array of thought from the primitive and the dream to the artistic figure of speech and extending to the scientific metaphor He draws on first person methodologies to restore the conscious self to a primary function in the generation of figurative thinking How does the individual originate and organize terms and ideas How can we differentiate between different types of thought and account for their origins Fisher depicts the self as mediator between trope and logical form Conversely he explicates the creation and articulation of the self through interplay between logic and icon Fisher explains how the I can step out of scripted roles The self is neither a discursive agent of postmodern linguistics nor a socially determined entity Rather it is a historically situated dynamically constituted place at the crossroads of conscious agency and unconscious actions and evolving contextual logics

and figures
