The Epistemic Innocence of Irrational Beliefs Lisa Bortolotti, 2020-06-11 In an ideal world our beliefs would satisfy norms of truth and rationality as well as foster the acquisition retention and use of other relevant information In reality we have limited cognitive capacities and are subject to motivational biases on an everyday basis We may also experience impairments in perception memory learning and reasoning in the course of our lives Such limitations and impairments give rise to distorted memory beliefs confabulated explanations and beliefs that are elaborated delusional motivated delusional or optimistically biased In this book Lisa Bortolotti argues that some irrational beliefs qualify as epistemically innocent where in some contexts the adoption maintenance or reporting of the beliefs delivers significant epistemic benefits that could not be easily attained otherwise Epistemic innocence does not imply that the epistemic benefits of the irrational belief outweigh its epistemic costs yet it clarifies the relationship between the epistemic and psychological effects of irrational beliefs on agency It is misleading to assume that epistemic rationality and psychological adaptiveness always go hand in hand but also that there is a straight forward trade off between them Rather epistemic irrationality can lead to psychological adaptiveness which in turn can support the attainment of epistemic goals Recognising the circumstances in which irrational beliefs enhance or restore epistemic performance informs our mutual interactions and enables us to take measures to reduce their irrationality without undermining the conditions for epistemic success
