Setting Up Your Generic DMI Monitor

It is important to set up the General OM Monitor in an area where it can continuously measure vital signs and transmit results. If you will be using any accessory devices, make sure that there will be enough room for you to attach them without any difficulty. To determine a suitable location, consider the following:

Abstract

Place the monitor on a flat, stable, and uncluttered surface, near a closed window or an outside wall. Be certain the monitor is easily accessible, and that a bed, chair, or other seating is available. Make sure that pins can easily attach to any available dividers.

100

Find a **PERMANENT** spot for the scale where you can easily stand on it. Be certain that the scale is placed on a solid, flat surface that provides adequate stability. The scale should not be moved.
