Kennedy, 2020-07-28 The book explores the state of social studies education within selected East Asian societies and provides some insights into distinctive classroom practices In an increasingly volatile and unpredictable world the education of young people who both understand the

contexts in which they are growing up and see the need for engaging with them is a top priority This task falls to social studies education which carries the responsibility for inducting young people into their social world and helping them to see the role they can play within it This is particularly important in East Asia where strong economic growth long held cultural values and diverse political systems create an environment that challenges young people on multiple fronts This book with its team of regional authors shows how different societies in the region are dealing with these challenges and what can be expected from future citizens The book will appeal to policy makers researchers and teachers interested in the current state of social studies education in East Asian societies

cultural and contextual factors in promoting science education and improving the standard and achievement of students in East Asian countries. The authors in this book discuss education reform and science curriculum changes and promotion of science and STEM education, parental roles and involvement in children's education, teacher preparation and professional development, and research in science education in the context of international benchmarking tests to measure the knowledge of mathematics and science such as the Trends in Mathematics and Science Study (TIMSS) and achievement in science mathematics and reading like Programme for International Student Assessment (PISA). Among the high achieving countries, the performance of the students in East Asian countries such as Singapore, Taiwan, Korea, Japan, Hong Kong, and China Shanghai are notable. This book investigates the reasons why students from East Asian countries consistently claim the top places in each and every cycle of those study. It brings together prominent science educators and researchers from East Asia to share their experience and findings, reflection and vision on emerging trends, pedagogical innovations and research informed practices in science education in the region. It provides insights into effective educational strategies and development of science education to international readers.

*Understanding Test and Exam Results Statistically* Kaycheng Soh, 2016-08-09

This book shares the goal of the classic text *How to Lie with Statistics*, namely preventing and correcting statistical misconceptions that are common among practitioners though its focus is on the educational context. It illustrates and discusses the essentials of educational statistics that will help educational practitioners to do this part of their job properly i.e. without making conceptual mistakes. The examples are cast in the school classroom contexts based on realistic rather than theoretical examples. The strongest aspect of the work or author's view is that the author can put himself in the shoes of teachers and make the work a very practical guide for teachers and school leaders. As a very experienced educator and researcher, the author knows very well about the knowledge skills that are essential for the professional development of teachers. He is able to explain the statistical and measurement concepts in plain language and with examples that are highly relevant to the target audience. In addition, the author also conveyed an important message to the target audience throughout the work by pointing out the mistakes and misunderstandings of the interpretation of test scores and measurement design. The author reminds the audience about the importance of proper use of tests and test scores when teachers and school leaders make any education decisions which has much implication on the professional integrity of teachers and school leaders.

Dr Joyce Kwan, The Education University of Hong Kong, Hong Kong

This book covers all the statistical tools for analyzing educational data and provides examples to explain the ideas. Chapters 10-17 are practical data analysis in educational data that helps readers have a better understanding of the procedure to analyze the data.

Dr Alpha Ling, The Education University of Hong Kong, Hong Kong

It looks like a very interesting book with attractive topics and practical problems in educational statistics. Though the topics remind me of the classic book *How to Lie with Statistics*, this book aims at preventing and correcting statistical misconceptions in educational context.

Nanyang Technological University Singapore      Hong Kong's Chinese History Curriculum from 1945 Flora L.F.

Kan,2007-01-01 Hong Kong's Chinese History Curriculum from 1945 Politics and Identity investigates the ways in which Chinese history has evolved as a subject in Hong Kong secondary schools since 1945 and the various social political and economic factors that have shaped the curriculum through an examination of a wide range of primary and secondary source materials and interviews This book examines how the aims content teaching learning and assessment of the Chinese history curriculum have evolved since 1945 It describes how Chinese history became an independent subject in secondary schools in Hong Kong despite the political sensitivity of the subject how it consolidated its status during the colonial period and how it has faced threats to its independence since the return of Hong Kong to China in 1997 An important element of the book is its in depth analysis of the major socio political and socio economic forces that have been involved in the development of Chinese history This book will be of interest to all who are interested in history education and curriculum development and readers who are concerned with history education      **School Leadership in the Context of Standards-Based Reform**

Louis Volante,2012-05-16 Although standards based reform emerged in the United States and the United Kingdom the idea has spread across the world as an approach to systemic reform It might appear that there is a world wide tsunami of standards based reform that will standardize and homogenize the educational system across the globe This volume makes it very clear however that there is no one approach to standards based reform and countries change there is a danger in paying attention to its evolution and impact in only one context That's what makes this volume so valuable Louis Volante has drawn together descriptions from a wide range of countries all involved in large scale reform and using standards and assessments as part of their process What becomes very obvious is that the language may be the same but the words reflect different contexts and can represent very different ideals values and processes I'm sure you will find this book as interesting and challenging as I have a gem that pushes your thinking and does not allow readers to remain neutral Lorna Earl      (*Free version*) *Abacus & Mental Arithmetic Course Book* Mathewmatician, All four arithmetic examples and exercises are provided with detailed and smooth versions of video teaching It is suitable to Children with strong self learning ability Parents who train their children on their own Kindergarten or Primary school teacher Students majoring in early childhood education or elementary education in universities and colleges Those who are interested in becoming an abacus and mental arithmetic teacher or are interested in running an abacus and mental arithmetic class      **Language International World Directory**
