Hildebrandt, 2023-12-05 The poetry imagery speeches and emotions readers encounter in texts like Job Psalms and Jeremiah are abundant resources for articulating the painful experiences of the human condition These compositions are sacred scripts that normalize and articulate the anxiety loneliness and despair that mark life on earth In *Vast as the Sea* Samuel

Hildebrandt presents an accessible exegetical study of these scripts that demonstrates how the Bible's ancient poetry speaks today. In conversation with current psychological research, Hildebrandt's poetic analyses invite readers to discover the personal and expressive contours of the biblical text as well as its liberating and healing potential. *Vast as the Sea* models an approach to the Old Testament that navigates a critical and creative balance between ancient contexts and contemporary life. Hildebrandt joins these two worlds together by maintaining a conscious focus on poetic language. By reflecting on individual words, engaging selected metaphors, and unpacking expressions and their underlying worldviews, *Vast as the Sea* gifts to its readers a reservoir of language for putting the pain of being human into words. The world-woe and wonder of Old Testament poetry is a vast yet overlooked resource for readers who are left speechless by the tumults of life and who struggle to reconcile such experiences with their faith. Promoting emotional literacy and wrestling with the tensions between confession and experience, *Vast as the Sea* will become a long-held treasured resource for scholars and everyday readers of the Bible as well as for practitioners in psychology and pastoral counseling.

Mothering Alone Mary Kay O'Neil, 2022-07-21 The lives of women are inextricably linked to the well-being of children. If they are not educated, if they are not healthy, if they are not empowered, the children are the ones who suffer. UNICEF report 2006. The study this book is based upon was of a pioneering facilitating programme enabling low-income mothers with little to no outside support to attend college or university. The women's stories are told in their own words and are used to explore the importance of education as a way to improve their and their children's lives. The book begins with an engaging Foreword from Rosemary H. Balsam, FRCPsych, London, MRCP, Edinburgh, Associate Clinical Professor of Psychiatry at Yale Medical School. Followed by the author's introduction, the book is then split into three parts. Part I sets the background of the study itself and of Western societal attitudes towards single mothers over the centuries. Mary Kay O'Neil also investigates common maternal tasks, the effect of parental and relational experiences, the life impact of becoming a mother, and the various influences on the decision to mother alone. Part II considers the characteristics basic to effective mothering: resilience, autonomy, and caring. In the light of the author's interest in women's development, Part III explores the psychodynamic understanding of mothers alone without resources and outlines society's role in providing the opportunity for them to become successful mothers. The parts are followed by an Afterword to summarise what was learned through the women's generous openness and to suggest societal improvements for increased opportunity. The book closes with two Appendices. The first tells the story of O'Neil's mother, who also mothered alone. The second delivers the research findings of the study for those interested in learning more. This clearly written book underlines the UNICEF statement above and does much to engage with the debate on support for those most vulnerable members of society.

Separation-Individuation Struggles in Adult Life Sarah Fels Usher, 2016-10-04 Separation-Individuation Struggles in Adult Life. Leaving Home focuses on the developmental task of separating from parents and siblings for individuals and couples who have not been able to resolve these issues earlier in life. Sarah Fels Usher extends Mahler's theory and includes

the writing of Loewald and Modell among others stressing the right of adult patients to a separate life She describes the predicament of Oedipal victors or victims their introjected feelings of responsibility for their parents and their resultant inability to be truly individuated adults Difficulties separating from siblings are also given analytic attention Usher's experience treating couples adds a new and powerful dimension to her theory She is optimistic throughout about the therapist's ability to help adult patients resolve the rapprochement sub phase in a satisfying manner An additional crucial question is raised when the author asks if the therapist can allow the patient to terminate treatment Has the therapist achieved separation from their own parents or indeed from their analyst Exploring the plight of patients of the unseparated analyst Usher describes how these generational factors rear their unfortunate heads when it is time to end therapy Listening to patients from the perspective of separation individuation is not new what is new is Usher's emphasis on how these particular issues are often masked by significant achievement in adult professional life Separation Individuation Struggles in Adult Life Leaving Home will be of great importance for psychoanalysts and psychoanalytic psychotherapists working with adults as well as for clinical postgraduate students

The Analyst's Torment Dhvani Shah, 2022-10-20 Dhvani Shah moves the focus from using psychoanalytic theory and technique to explore the patient's mind from a safe distance Instead he concentrates on the analyst's feelings subjective experiences and histories and how these impact on the intersubjective space between analyst and patient His eight chapters each highlight a particular emotional state or problematic feeling and explore their impact on the analytic work which requires emotional honesty and open reflection This authenticity is vital for every unique encounter within the shared space of both the analyst and patient The analyst must strive to be responsive yet disciplined and this requires the work of mentalization An ability to go there with patients offers the best chance at helping them The analyst's uncomfortable and disowned emotional states of mind are inevitably entangled with the therapeutic process and this has the potential to derail or facilitate progress The chapters deal with uncomfortable themes for the analyst to face arrogance racism dread and its close relation erotic dread dissociation shame hopelessness and jealousy These bring up common ways in which analysts stop listening and struggle in the face of uncertainty and intensity the difficulties in facing unbearable experiences with patients such as suicidality disruptions to being with patients in an affective and embodied way and thwarted fantasies of being the hero With all of these difficult topics Shah describes painful and tormenting experiences in a clinically meaningful way that allow growth In this exceptional debut work Shah demonstrates that what analysts feel in their affects bodies and reveries with patients is vital in helping them to understand and metabolise the patient's emotional experiences This is a must read for all practising clinicians

Beyond the Primal Addiction Nina Savelle-Rocklin, Salman Akhtar, 2019-03-05 Written by experienced practitioners in the fields of addiction and psychoanalysis and illustrated by a range of moving vignettes this groundbreaking book examines the psychological foundations of addiction in the areas of food sex gambling internet usage shopping and work This book not only explores the roots of addictive

behavior explaining why popular treatment options such as the 12 Step Program often fail it also provides insights for emotional resolution and strategies for behavioral change Beyond the Primal Addiction seeks to understand rather than pathologize addictive behaviours now so pervasive in contemporary societies It will be essential reading for psychoanalysts psychotherapists and other mental health professionals as well as their clients **A Web of Sorrow** Salman

Akhtar,2018-03-26 Bringing together the experiences of mistrust jealousy lack of love shamelessness regret and despair this far reaching book elucidates human sorrow in striking sociocultural and clinical details **Mistrust** Salman

Akhtar,2018-03-26 Humans are weak Lacking the claws and thick skins of other animals we are forced to rely on members of our own species to survive and flourish in the world The fact that the human infant is born in an utterly helpless state also makes others protective care necessary Attachment bonding concern and mutuality thus become cornerstones of human existence Trust also enters this equation Originating in the early mother child relationship trust continues to grow get contextually refined tempered by reality testing and gain nuances throughout the subsequent adult life Its absence mistrust or malformation distrust contributes to psychopathology and is responsible for much intrapsychic distress and interpersonal strife Given its formative significance and its crucial role in the therapeutic process one is surprised by the paucity of psychoanalytic writings specifically devoted to the topic of trust and mistrust Few if any monographs on trust exist A collection of essays written specifically for this volume it deals with the ontogenesis psychopathology cultural vicissitudes and technical implications of trust and mistrust Six Children Ann G. Smolen,2018-03-29

Theoretically anchored and historically informed Six Children is a book about the nuances of child psychoanalysis as these unfold in the encounter with different forms of early life anguish Addressing autistic homeless and despondent children on the one hand and greedy betrayed and angry children on the other the book attempts to integrate developmental deficits intrapsychic conflicts and constitutional givens in evolving a deeper understanding of both severe and milder psychopathology Ample clinical illustrations are provided and technical interventions pertinent to each of these situations are carefully fleshed out Equal attention is given to holding and interpretation family intervention and individual focus and affect management and mentalization The fact that the six main chapters of the book are sandwiched between a careful review and update of the field of child analysis makes the book especially suited for being used as a teaching tool in didactic curricula A comprehensive and carefully selected bibliography imparts the book a scholarly quality which exists alongside the text s literary and humane cadence *Jealousy* Mary Kay O'Neil,Salman Akhtar,2020-07-24

Jealousy is a human feeling experienced by everyone in varying intensities at different times and phases of growth Frequently confused jealousy and envy are often intertwined Even within the psychoanalytic literature confusion persists and much less has been written about jealousy than envy However unlike envy jealousy involves three entities and affects all people involved It can be painful as other difficult to bear feelings e g shame guilt anger hatred underlie jealousy Yet total absence of jealousy renders a person

less human less relational In analytic terms jealousy is a defense against emotional anguish This book begins with an extensive overview of the nature developmental origins and poignant cultural especially poetic allusions to jealousy emphasizing that it is through artistic expression that a true understanding of this frequently deeply disturbing feeling is achieved It closes with a thoughtful summary synthesis and critique of the chapters by 12 distinguished analysts

Eco-Centred Therapy Bernie Neville, Keith Tudor, 2023-12-01 Offering a much needed update of Rogerian theory and practice and based on insights from cultural studies and ecopsychology this book breaks new ground by questioning the relevance of certain ways of thinking about counselling and psychotherapy not least in the current planetary emergency In response to the growing need for therapists to address increasing anxieties about the climate crisis Bernie Neville and Keith Tudor address the issue in terms that help therapists reflect on their practice Based on the authors previous publications and incorporating new material this book presents and explores ideas that have been largely neglected in person centred literature It re visions person centred psychology PCP from what has become predominantly its application to individuals to a broader perspective on and about life and the living world Further it takes a philosophical and cultural perspective to re present and re vision PCP as a we psychology an eco psychology and an eco therapy This book will be of interest to those working in the fields of person centred therapy ecopsychology and ecotherapy as well as those involved in the education training and supervision of counsellors and psychotherapists

Shame Salman Akhtar, 2018-03-29 This book offers ten distinguished analysts insights on shame from various perspectives which include its developmental substrate vicissitudes during adolescence and manifestations in the course of aging and infirmity It seeks to advance clinicians empathy and therapeutic skills in this realm

Arrogance Salman Akhtar, Ann Smolen, 2018-07-04 Arrogance as a specific constellation of affect fantasy and behavior has received little attention in psychoanalysis This is striking in light of the enormous amount of literature accumulated on the related phenomenon of narcissism Rectifying this omission the book in your hands addresses arrogance from multiple perspectives Among the vantage points employed are psychoanalysis evolutionary psychology cross cultural anthropology fiction as well as clinical work with children and adults The result is a harmonious gestalt of insight that is bound to enhance the clinician s attunement to the covert anguish of those afflicted with arrogance

Regret Salman Akhtar, Shahrzad Siassi, 2018-05-08 This book is devoted to the developmental substrate of regret and of its vicissitudes over the life span It deals with fiction poetry and movies pertaining to regret The book elucidates the psychopathological dimension of ego restriction associated with regret

Loss Salman Akhtar, 2019-11-19 The experience of loss is ubiquitous in human life but its nature and impact have great variations When loss is phase specific expected and accompanied by compensatory supplies it can lead to ego growth When loss is untimely unexpected and unaccompanied by environmental holding it becomes traumatic and needs clinical attention This edited volume brings together a distinguished cadre of international contributors in order to explain the multifaceted and nuanced nature of loss from a variety of different

perspectives These clinicians administrators and writers delineate the great variability in the setting antecedents and consequences of loss Development facilitating and development impeding losses are addressed and so are the losses that seem inevitable as one moves from childhood through adolescence and young adulthood to midlife and old age Loss experienced by institutional organizations and war torn societies is also examined The book s ultimate focus is clinical it highlights the many technical dilemmas in working with grieving patients and offers therapeutic strategies aimed at ameliorating their anguish Loss Developmental Cultural and Clinical Realms will appeal to psychoanalysts and psychotherapists both in practice and training from a variety of different backgrounds
