Identity and Collaboration in World of Warcraft Phillip Michael Alexander,2018-03-25 Electracy and Transmedia Studies Series Editors Jan Rune Holmevik and Cynthia Haynes IDENTITY AND COLLABORATION IN WORLD OF WARCRAFT tells the story of what happens when a Cherokee gamer using a storyteller's perspective and a methodology built from equal parts Indigenous tradition and current academic field knowledge spends a year in what was at the time the largest online video game in the world Following from work by James Paul Gee and Bonnie Nardi Phillip Michael Alexander ventured forth into the game world to see what someone who was a gamer long before he was an academic might see in this same fascinating virtual space In working with playing with and sharing the stories of a ten person raid group players performing at the highest level within the game he set out to determine how those gamers most invested in success built identities and communities The resulting work is a reader friendly theory informed virtual boots on the virtual ground look at how gamers craft in game identities find like minded gamers to form group identities then organize to do staggering amounts of work in a virtual world For anyone who ever wondered what the appeal of World of Warcraft is Phillip Michael Alexander illustrates how some of the most active most engaged and most talented players spend their time in that virtual world

Virtually Sacred Robert M. Geraci,2014-06-13 Millions of users have taken up residence in virtual worlds and in those worlds they find opportunities to revisit and rewrite their religious lives Robert M Geraci argues that virtual worlds and video games have become a locus for the satisfaction of religious needs providing many users with devoted communities opportunities for ethical reflection a meaningful experience of history and human activity and a sense of transcendence Using interviews surveys and his own first hand experience within the virtual worlds Geraci shows how World of Warcraft and Second Life provide participants with the opportunity to

rethink what it means to be religious in the contemporary world Not all participants use virtual worlds for religious purposes but many online residents use them to rearrange or replace religious practice as designers and users collaborate in the production of a new spiritual marketplace Using World of Warcraft and Second Life as case studies this book shows that many residents now use virtual worlds to re imagine their traditions and work to restore them to authentic sanctity or else replace religious institutions with virtual communities that provide meaning and purpose to human life For some online residents virtual worlds are even keys to a post human future where technology can help us transcend mortal life Geraci argues that World of Warcraft and Second Life are virtually sacred because they do religious work They often do such work without regard for and frequently in conflict with traditional religious institutions and practices ultimately they participate in our sacred landscape as outsiders competitors and collaborators
