Hospital Unit Clerk Test:

Making Computerized Provider Order Entry Work Philip Smith, 2012-09-19 Despite all the jokes about the poor quality of physician handwriting physician adoption of computerized provider order entry CPOE in hospitals still lags behind other industries use of technology As of the end of 2010 less than 22% of hospitals had deployed CPOE Yet experts claim that this technology reduces over 80% of medication errors and could prevent an estimated 522 000 serious medication errors annually in the US Even though the federal government has offered 20 billion dollars in incentives to hospitals and health systems through the 2009 stimulus the ARRA HITECH section of the American Recovery and Reinvestment Act of 2009 many organizations are struggling to implement advanced clinical information systems including CPOE In addition industry experts estimate that the healthcare industry is lacking as many as 40 000 persons with expertise in clinical informatics necessary to make it all happen by the 2016 deadline for these incentives While the scientific literature contains numerous studies and stories about CPOE no one has written a comprehensive practical guide like *Making CPOE Work* While early adopters of CPOE were mainly academic hospitals community hospitals are now proceeding with CPOE projects and need a comprehensive guide *Making CPOE Work* is a book that will provide a concise guide to help both new and experienced health informatics teams successfully plan and implement CPOE The book in a narrative style draws on the author's decade long experiences of implementing CPOE at a variety of academic pediatric and community hospitals across the United States

Division of Associated Health Professions, 1978 *Allied Health Education Programs in Junior and Senior Colleges*, 1975 *Implementing Health Care Information Systems* Helmuth F. Orthner, Bruce I. Blum, 2012-12-06 This series in Computers and Medicine had its origins when I met Jerry Stone of Springer Verlag at a SCAMC meeting in 1982 We determined that there was a need for good collections of papers that would help disseminate the results of research and application in this field I had already decided to do what is now *Information Systems for Patient Care* and Jerry contributed the idea of making it part of a series In 1984 the first book was published and thanks to Jerry's efforts *Computers and Medicine* was underway Since that time there

have been many changes Sadly Jerry died at a very early age and cannot share in the success of the series that he helped found On the bright side however many of the early goals of the series have been met As the result of equipment improvements and the consequent lowering of costs computers are being used in a growing number of medical applications and the health care community is very computer literate Thus the focus of concern has turned from learning about the technology to understanding how that technology can be exploited in a medical environment
