Hernandez-Jimenez, 2024-06-26 Patients with sensitive skin often pose a problem for skincare specialists First as their complaints are often subjective burning itching tightness and tingling which cannot be seen with the naked eye it is not always clear what to work with and how to diagnose and evaluate the therapy outcomes Second for many people skin hypersensitivity is typically initiated by cosmetics which is the main skincare tool so skincare practitioners may avoid such clients who likely expect cosmetics used in treatment to only make things worse Yet this is not the case as the right cosmetic care and treatment can take away the unpleasant symptoms thereby contributing to a significant improvement in the quality of life for people with sensitive skin This book was created to help dermatologists and other skincare professionals better understand this syndrome allowing them to tailor their correction protocols to each case For this purpose we have gathered as much up to date information as possible given that research in recent years has helped to make significant advances in our understanding of this condition Why do not all patients with sensitive skin have problems with the skin barrier even though it was previously considered a must Why is hypersensitivity present even though a reduction in nerve endings is found in many patients Does the microbiome influence the development of sensitivity symptoms and what are the dangers of psychological stress You will find the answers to these and other questions in our new book This is important knowledge and new nuances presented within these pages will help you build a truly effective therapy The main part of the book is devoted to building an effective care strategy for sensitive skin For this purpose all complex treatment approaches are considered from limiting triggers protection and cleansing which are very specific to this condition to modern therapeutic modalities that affect each of the mechanisms of sensitive skin pathogenesis As all of them have their own nuances these will also be discussed in detail In addition the peculiarities of diagnosing this condition and how to distinguish it from other skin pathologies atopic allergic

contact dermatitis and rosacea are provided Separate sections are devoted to the problems of skin sensitivity with age related changes the possibilities of correcting the symptoms of sensitive scalp as well as psychological help to patients which can be provided by a skincare specialist These issues are rarely talked about but addressing them greatly improves the condition of patients with sensitive skin syndrome Given the wealth of information presented in this book it will be useful to dermatologists and skincare specialists working with individuals experiencing sensitive skin problems as well as all interested parties Of course it will also help people with sensitive skin to evaluate advertising claims in a balanced way and to base their skincare on reliable information

Encounters with Aging Margaret M. Lock, 1994-01-20 Margaret Lock explicitly compares Japanese and North American medical and political accounts of female middle age to challenge Western assumptions about menopause She uses ethnography interviews statistics historical and popular culture materials and medical publications to produce a richly detailed account of Japanese women's lives The

result offers irrefutable evidence that the experience and meanings even the endocrinological changes associated with female midlife are far from universal Rather Lock argues they are the product of an ongoing dialectic between culture and local biologies Japanese focus on middle aged women as family members and particularly as caretakers of elderly relatives They attach relatively little importance to the end of menstruation seeing it as a natural part of the aging process and not a diseaselike state heralding physical decline and emotional instability Even the symptoms of midlife are different Japanese women report few hot flashes for example but complain frequently of stiff shoulders Articulate passionate and carefully documented Lock s study systematically undoes the many preconceptions about aging women in two distinct cultural settings Because it is rooted in the everyday lives of Japanese women it also provides an excellent entree to Japanese society as a whole Aging and menopause are subjects that have been closeted behind our myths fears and misconceptions Margaret Lock s cross cultural perspective gives us a critical new lens through which to examine our assumptions

Reframing Aging

Melissa K. Melby, 2025-09-10 How do we age Why do we age How and why does menopause happen Do different cultures have different approaches and attitudes to and experiences of aging and menopause Reframing Aging Insights from Biology and Culture of Midlife Japanese uses a biocultural framework to try to answer these questions and gain insights on aging and menopause in Japan the United States and beyond Drawing on years of fieldwork and lab work in Japan and over a decade of living and working in Japan at several universities and the National Institute of Health and Nutrition with follow up interviews spanning over 20 years Melissa Melby challenges what are often considered normal experiences of aging and menopause This book introduces a proximate ultimate biocultural framework to guide the reader through questions of how proximate and why ultimate we age and experience menopause as we do Drawing insights from evolutionary biology and societal level phenomena and the language of lived experience it explores how cross cultural variation in expectations medicalization collectivism lifestyles and other factors may influence how symptoms of aging and menopause are perceived experienced and treated Reframing Aging Insights from Biology and Culture of Midlife Japanese offers new approaches and insightful perspectives for students of biological cultural anthropology gerontology Asian studies women and gender studies medicine and public health

Health Psychology Elizabeth D. Whitaker, 2016-12-05 This reader looks at both the biological and cultural aspects of health and healing within a comparative framework Health and Healing in Comparative Perspective provides both fascinating comparative ethnographic detail and a theoretical framework for organizing and interpreting information about health While there are many health related fields represented in this book its core discipline is medical anthropology and its main focus is the comparative approach Cross cultural comparison gives anthropological analysis breadth while the evolutionary time scale gives it depth These two features have always been fundamental to anthropology and continue to distinguish it among the social sciences A third feature is the in depth knowledge of culture produced by anthropological methods such as participant observation involving long term presence in and research among a
