Report highlights

Integrating is the overwhelming challenge today by efforts everywhere – making it harder to evaluate the impact of different design alternatives.

When the time to release a new product is approaching, product development is often a collection of silos. Throughout the product lifecycle and design process,

simulation has become an essential element in ensuring that designs are delivered, production is streamlined, and the customer is satisfied. Platforms that can integrate design,

engineering, a consolidated development platform, robust business models, better collaboration, this global competitive structure enables strategic growth, optimized for multiple markets.

As the world becomes more interconnected, the need for a platform that integrates with your business is becoming a reality. Specifically, it will help in the following ways:
- Reduce the time to market for new products
- Increase the efficiency of the design process
- Improve the quality of the product
