Basics of Multilateral Institutions and Organizations: Economics and Commerce G. Gregory Letterman, 2021-11-22 Identifying the relevant multilateral institutions and multinational organizations involved in particular aspects of international finance and trade often proves to be difficult This book makes that process easy while providing valuable descriptions of and insights into those institutions and organizations Chapter topics examine multilateral institutions and organizations generally and their major umbrella organization the United Nations concerned with national currencies

national solvency financial institutions and securities exchange and international financial transactions and securities promoting economic development regulating international trade dealing with international product and performance standards standardized legal commercial rules and common usages and documents through international conventions and treaties the harmonization of national commercial laws and accepted sectoral practices protecting international intellectual property rights managing international environmental commodities and natural resources matters resolving international disputes and involved with other international finance and trade matters No other book now in print covers this topic None is likely to ever do so with such thoroughness and clarity Published under the Transnational Publishers imprint **East African Economic Review**, 1964 **Predatory Pricing in Antitrust Law and Economics** Nicola Giocoli, 2014-01-10 Can a price ever be too low Can competition ever be ruinous Questions like these have always accompanied American antitrust law They testify to the difficulty of antitrust enforcement of protecting competition without protecting competitors As the business practice that most directly raises these kinds of questions predatory pricing is at the core of antitrust debates The history of its law and economics offers a privileged standpoint for assessing the broader development of antitrust its past present and future In contrast to existing literature this book adopts the perspective of the history of economic thought to tell this history covering a period from the late 1880s to present times The image of a big firm such as Rockefeller's Standard Oil or Duke's American Tobacco crushing its small rivals by underselling them is iconic in American antitrust culture It is no surprise that the most brilliant legal and economic minds of the last 130 years have been engaged in solving the predatory pricing puzzle The book shows economic theories that build rigorous stories explaining when predatory pricing may be rational what welfare harm it may cause and how the law may fight it Among these narratives a special place belongs to the Chicago story according to which predatory pricing is never profitable and every low price is always a good price
