**Biological Data Mining And Its Applications In Healthcare** Xiaoli Li, See-kiong Ng, Jason T L Wang, 2013-11-28 Biologists are stepping up their efforts in understanding the biological processes that

underlie disease pathways in the clinical contexts This has resulted in a flood of biological and clinical data from genomic and protein sequences DNA microarrays protein interactions biomedical images to disease pathways and electronic health records To exploit these data for discovering new knowledge that can be translated into clinical applications there are fundamental data analysis difficulties that have to be overcome Practical issues such as handling noisy and incomplete data processing compute intensive tasks and integrating various data sources are new challenges faced by biologists in the post genome era This book will cover the fundamentals of state of the art data mining techniques which have been designed to handle such challenging data analysis problems and demonstrate with real applications how biologists and clinical scientists can employ data mining to enable them to make meaningful observations and discoveries from a wide array of heterogeneous data from molecular biology to pharmaceutical and clinical domains

### **Intelligent Data Analytics, IoT, and Blockchain**

Bashir Alam,Mansaf Alam,2023-10-30 This book focuses on data analytics with machine learning using IoT and blockchain technology Integrating these three fields by examining their interconnections Intelligent Data Analytics IoT and Blockchain examines the opportunities and challenges of developing systems and applications exploiting these technologies Written primarily for researchers who are working in this multi disciplinary field the book also benefits industry experts and technology executives who want to develop their organizations decision making capabilities Highlights of the book include Using image processing with machine learning techniques A deep learning approach for facial recognition A scalable system architecture for smart cities based on cognitive IoT Source authentication of videos shared on social media Survey of blockchain in healthcare Accident prediction by vehicle tracking Big data analytics in disaster management Applicability limitations and opportunities of blockchain technology The book presents novel ideas and insights on different aspects of data analytics blockchain technology and IoT It views these technologies as interdisciplinary fields concerning processes and systems that extract knowledge and insights from data Focusing on recent advances the book offers a variety of solutions to real life challenges with an emphasis on security

### **Membrane Computing**

Gheorghe Paun,Mario J. Perez-Jimenez,Agustin Riscos-Nunez,Grzegorz Rozenberg,Arto Salomaa,2010-01-20 This book constitutes the thoroughly refereed post workshop proceedings of the 10th International Workshop on Membrane Computing WMC 2009 held in Curtea de Arges Romania during August 24 to 27 2009 under the auspices of the European Molecular Computing Consortium EMCC and the Molecular Computing Task Force of IEEE Computational Intelligence Society The 22 revised full papers presented together with 10 invited papers went through two rounds of reviewing and improvement The papers in this volume cover all the main directions of research in membrane computing ranging from theoretical topics in mathematics and computer science to application issues the invited lectures present fundamental contributions to membrane computing thus highlighting important directions of current research in this area

*Issues in Computer Science and Theory: 2011 Edition* ,2012-01-09

Issues in Computer Science and Theory 2011 Edition is a ScholarlyEditions eBook that delivers timely authoritative and

comprehensive information about Computer Science and Theory The editors have built Issues in Computer Science and Theory 2011 Edition on the vast information databases of ScholarlyNews You can expect the information about Computer Science and Theory in this eBook to be deeper than what you can access anywhere else as well as consistently reliable authoritative informed and relevant The content of Issues in Computer Science and Theory 2011 Edition has been produced by the world s leading scientists engineers analysts research institutions and companies All of the content is from peer reviewed sources and all of it is written assembled and edited by the editors at ScholarlyEditions and available exclusively from us You now have a source you can cite with authority confidence and credibility More information is available at [http www ScholarlyEditions com](http://www.ScholarlyEditions.com)      **Mobile Ad Hoc Networks** Jonathan Loo,Jaime Lloret Mauri,Jesús Hamilton

Ortiz,2016-04-19 Guiding readers through the basics of these rapidly emerging networks to more advanced concepts and future expectations this book examines the most pressing research issues in Mobile Ad hoc Networks MANETs Leading researchers industry professionals and academics provide an authoritative perspective of the state of the art in MANETs The book includes surveys of recent publications that investigate key areas of interest such as limited resources and the mobility of mobile nodes It considers routing multicast energy security channel assignment and ensuring quality of service

**Computational Intelligence for Multimedia Big Data on the Cloud with Engineering Applications** Arun Kumar Sangaiah,Zhiyong Zhang,Michael Sheng,2018-08-21 Computational Intelligence for Multimedia Big Data on the Cloud with Engineering Applications covers timely topics including the neural network NN particle swarm optimization PSO evolutionary algorithm GA fuzzy sets FS and rough sets RS etc Furthermore the book highlights recent research on representative techniques to elaborate how a data centric system formed a powerful platform for the processing of cloud hosted multimedia big data and how it could be analyzed processed and characterized by CI The book also provides a view on how techniques in CI can offer solutions in modeling relationship pattern recognition clustering and other problems in bioengineering It is written for domain experts and developers who want to understand and explore the application of computational intelligence aspects opportunities and challenges for design and development of a data centric system in the context of multimedia cloud big data era and its related applications such as smarter healthcare homeland security traffic control trading analysis and telecom etc Researchers and PhD students exploring the significance of data centric systems in the next paradigm of computing will find this book extremely useful Presents a brief overview of computational intelligence paradigms and its significant role in application domains Illustrates the state of the art and recent developments in the new theories and applications of CI approaches Familiarizes the reader with computational intelligence concepts and technologies that are successfully used in the implementation of cloud centric multimedia services in massive data processing Provides new advances in the fields of CI for bio engineering application      **Neutrosophic Sets and Systems, Vol. I** Florentin Smarandache,Mumtaz Ali, This volume is a collection of ten papers written by different authors and co authors listed in the
