International Financial Management Jeff Madura, Oliver Schnusenberg, 2002-03. Global Financial Analysis and Economic Sustainability Professor Dr. Vijayakumaran Kathiaryan, Dr. Shakir Shaufit Affandi, 2024-05-01. The global financial system is the worldwide framework of legal agreements, institutions and both formal and informal economic actors that together facilitate international flows of financial capital for purposes of investment and trade financing. Since emerging in the late 19th century during the first modern wave of economic globalization, its evolution is marked by the establishment of central banks, multilateral treaties and intergovernmental organizations aimed at improving the transparency, regulation and effectiveness of international markets. In the late 1800s, world migration and communication technology facilitated unprecedented growth in international trade and investment. At the onset of World War I, trade contracted as foreign exchange markets became paralyzed by money market illiquidity. Countries sought to defend against external shocks with protectionist policies and trade virtually halted by 1933, worsening the effects of the global Great Depression until a series of reciprocal trade agreements slowly reduced tariffs.

worldwide Efforts to revamp the international monetary system after World War II improved exchange rate stability fostering record growth in global finance
