Ethical Theory in the Study of International Politics Mark Evans, 2004 This book is designed to introduce readers to a representative range of work which raises what should be regarded as pressing ethical issues in the context of international politics Although by no means comprehensive in coverage of the possible questions that could be appropriately asked the chapters convey a sense of how variegated is the field of ethical inquiry in the global realm Some of the issues are familiar to students of international

relations some of them less so What they all show however is that the academic discipline of international relations has much to learn and benefit from how such problems may be addressed using techniques and approaches that have until recently been rather more exclusively restricted to domestic nation statist political theory From the Introduction Contents Introduction Topics in International Political Theory Who Should Pay And How Much for Realising Human Rights World Citizenship and The Ethics of Individual Responsibility World Hunger Moral Theory and Radical Rawlsianism Kids R Us Children as Political Bodies Dealing with the Past Forgiveness and the Reconstruction of Memory in Divided Societies Outsour *The Shifts in Hizbullah's Ideology* Joseph Elie Alagha,2006 Analyses of the political and ideological transformation of Hizbullah *Hizbullah's Identity Construction* Joseph Elie Alagha,2011 The important study title offers a revolutionary new perspective on the political phenomenon of Hizbullah whose evolution has frequently confounded scholars and politicians Drawing on his unparalleled access to primary sources Alagha has produced a unique work which traces all the shifts in Hizbullah s construction and reconstruction of its identity Publisher s site [A Chinese Theory of International Law](#) Zhipeng He,Lu Sun,2020-03-14 This book analyzes China s attitude to international law based on historical experiences and documents and provides an explanation of China s approaches to international legal issues It also establishes several elements for a possible framework of Chinese theory on international law The book offers researchers university students and practitioners valuable insights into how China views international law and why it does so in the way it does [Fairy Tales and International Relations](#) Kathryn Starnes,2016-12-08 This book offers a critical engagement with contemporary IR textbooks via a novel folklorist approach Two parts of the folklorist approach are developed addressing story structures via resemblances to two fairy tales and engaging with the role of authors via framing gestures The book not only looks at how the idea of social science may persist in textbooks as many assumptions about what it means to study IR but also at how these assumptions are written into the defining stories textbooks tell and the possibilities for re negotiating these stories and the boundaries of the discipline This book will specifically engage with how the stories in textbooks constrain how it is possible to define IR through its re production as a social science discipline In the first part story structures are explored via Donkeyskin and Bluebeard stories which the book argues resemble some structures in textbooks that define how it is permissible to tell stories about IR In the second part the role of authors is explored via their framing gestures within a text drawing on a number of fairy tales By approaching the stories in textbooks alongside fairy tales Starnes reflects back onto IR the disciplining practices in the stories textbooks tell by rendering them unfamiliar Aiming to spark a critical conversation about the role of textbooks in defining the boundaries of what counts as IR and by extension the boundaries of the IR canon this book is of great interest to students and scholars of international relations **American Nation-Building** Kevin Dougherty,Robert J. American Book Publishing Record ,2005 [Ancient Chinese Thought, Modern Chinese Power](#) Yan

Xuetong, 2013-08-25 From China s most influential foreign policy thinker a vision for a Beijing Consensus for international relations The rise of China could be the most important political development of the twenty first century What will China look like in the future What should it look like And what will China s rise mean for the rest of world This book written by China s most influential foreign policy thinker sets out a vision for the coming decades from China s point of view In the West Yan Xuetong is often regarded as a hawkish policy advisor and enemy of liberal internationalists But a very different picture emerges from this book as Yan examines the lessons of ancient Chinese political thought for the future of China and the development of a Beijing consensus in international relations Yan it becomes clear is neither a communist who believes that economic might is the key to national power nor a neoconservative who believes that China should rely on military might to get its way Rather Yan argues political leadership is the key to national power and morality is an essential part of political leadership Economic and military might are important components of national power but they are secondary to political leaders who act in accordance with moral norms and the same holds true in determining the hierarchy of the global order Providing new insights into the thinking of one of China s leading foreign policy figures this book will be essential reading for anyone interested in China s rise or in international relations **Contemporary Africa and the Foreseeable World**
