Internet Security Report 2008:

Routledge Handbook of International Criminology Cindy J. Smith, Sheldon X. Zhang, Rosemary Barberet, 2011-05-03
The Routledge Handbook of International Criminology brings together the latest thinking and findings from a diverse group of both senior and promising young scholars from around the globe. This collaborative project articulates a new way of thinking about criminology that extends existing perspectives in understanding crime and social control across borders, jurisdictions and cultures and facilitates the development of an overarching framework that is truly international. The book is divided into three parts in which three distinct yet overlapping types of crime are analyzed: international crime, transnational crime, and national crime. Each of these perspectives is then articulated through a number of chapters which cover theory and methods, international and transnational crime analyses, and case studies of criminology and criminal justice in relevant nations. In addition, questions placed at the end of each chapter encourage greater reflection on the issues raised and will encourage young scholars to move the field of inquiry forward. This handbook is an excellent reference tool for undergraduate and graduate students with particular interests in research methods, international criminology, and making comparisons across countries. *World Wide Web*, **Engineering Secure Software and Systems** Jan Jürjens, Frank Piessens, Nataliia Bielova, 2014-02-18
This book constitutes the refereed proceedings of the 6th International Symposium on Engineering Secure Software and Systems ESSoS 2014 held in Munich, Germany, in February 2014. The 11 full papers presented together with 4 idea papers were carefully reviewed and selected from 55 submissions. The symposium features the following topics: model-based security, formal methods, web and mobile security, and applications. **The UK Cyber Security Strategy** Great Britain: National Audit Office, 2013-02-12
The cost of cyber crime to the UK is currently estimated to be between 18 billion and 27 billion. Business, government, and the public must therefore be constantly alert to the level of risk if they are to succeed in detecting and resisting the threat of cyber attack. The UK Cyber Security Strategy published in November 2011 set out how the Government planned to deliver the National Cyber Security Programme through to 2015, committing 650 million of additional funding. Among progress reported so far, the Serious Organised Crime Agency repatriated more than 2.3 million items of compromised card payment details to the financial sector in the UK and internationally since 2011, preventing a potential economic loss of more than 500 million. In the past year, moreover, the public reported to Action Fraud over 46,000 reports of cyber crime amounting to 292 million worth of attempted fraud. NAO identifies six key challenges faced by the Government in implementing its cyber security strategy in a rapidly changing environment. These are: the need to influence industry to protect and promote itself; and UK plc to address the UK's current and future ICT and cyber security skills gap; to increase awareness so that people are not the weakest link; to tackle cyber crime and enforce the law; to get government to be more agile and joined up; and to demonstrate value for money. The NAO recognizes, however, that there are some particular challenges in establishing the value for money. **Securing Freedom in**
