

## Five paragraph interpretive essay directions --

### A. Introduction

1. Attention-getting statement (no general ideas about the human race and no rhetorical questions) -- A relevant quotation from the story or an outside source is a useful idea *if you cite your source properly*.

2. Necessary information

title

author

brief plot statement -- remember the "theme" statement from LOTF?--something similar

You can weave the title/author information into the thesis statement if it sounds good, but don't forget the brief plot statement.

3. Thesis statement -- contains three parts that predict the direction of the paper

Ask yourself this question -

**How does Welch fortell the direction of the story of Fools Crow through the images of the Part II pictograph?**

Your thesis will be *the answer* to that question -- conceived in three points. How to organize this essay? Look at the pictograph in three sections, or notice the three most telling images, or observe the pictograph from the general to the specific, or maybe use another organizational strategy that you devise that allows you to fully explicate or interpret the relationship of the images to the movement of Part II of Welch's story. Your thesis will then be the blueprint for your reader to follow your argument/interpretation.

### B. Body Paragraphs -- write three paragraphs -- one for each part of the thesis

Since a paragraph is a group of sentences that share a **single** idea, each topic sentence must have both a topic and a limiting idea. An example of such a topic sentence (from "The Necklace" by Maupassant):

*Because Madame Louise is superficial, she misses the deeper appreciation of most things in her life.*

*Madame Louise* = topic

*superficiality* = limiting idea

Next, the paragraph should provide context for an example that supports the contention (claim) of the topic sentence. Then, provide that example. In the case of the Fools Crow interpretive essay, provide plot events and quotations (cited properly) as support for your interpretation. After you provide that example, explain how your example supports this topic of the thesis statement. **DO NOT** merely tell your reader what the example means; this can lead to summary. *You need to analyze -- show your interpretation.* Remember I have read the book, and I am interested in your interpretation of the pictograph. Beware! Even interpretation is subject to the actual progression of the story. Stay true to Welch's plot.

### C. Conclusion

Your conclusion should not merely be a summary. Rather, it should *restate* and *reemphasize* your thesis. Show the importance of the analysis that you have been making in the paper. Show them how the points you made and the support and examples you used were not random, but fit together. Provide a clincher, which might come back to your attention-getter.

Echoing your introduction can be a good strategy if it is meant to bring the reader full-circle. If you begin by describing a scenario, you can end with the same scenario (in different words) as proof that your essay was helpful *in creating a new understanding*.

What **NOT** to do in a concluding paragraph:

**DO NOT** use cliches which may sound good but mean nothing

**DO NOT** introduce new arguments, evidence, or details

**DO NOT** apologize for doing a poor job of presenting the material

**DO NOT** qualify (to make less strong) or blunt the impact of points made earlier

Locke excludes uncertainty from the analysis of practical decision making in general and from economic decision making in particular. Accordingly, it can be anticipated that the enclosed genealogy will assist economists to more adequately develop the idea of uncertainty within economic theory.

Nonprofit Organizations and the Combatting of Terrorism Financing Emile van der Does de Willebois, 2010-11-10 One of the ways in which terrorist organisations raise and transfer funds is by using non-profit organisations (NPOs). Ever since the adoption of the Special Recommendation VIII on the abuse of NPOs for terrorism financing purposes by the FATF in 2001, countries have struggled to find a proper way to address this potential terrorism financing risk. In many important ways, however, the work of NPOs

deal with the conditions conducive to the spread of terrorism so it is essential that in trying to address one aspect of the terrorist threat terrorism financing we do not inadvertently diminish the impact of other ways of tackling the issue This article argues that in discussing the threat and how to address it policy makers need to be specific not tainting the whole sector with the same brush Virtually all governments already interact with the NPO sector and those avenues should be used for dealing with this issue it is inefficient and ultimately counterproductive to devise an entirely new regulatory framework The ultimate objective is to enhance the transparency of the sector the people in charge of NPOs their sources of funds and particularly the way those funds are spent That aim serves a much wider purpose than just countering terrorism financing and touches on many aspects of civil society good governance that the sector itself and others have been debating for a long time When devising public policy on this issue the contribution of the NPO sector to fighting terrorism be recognized and used to its full advantage Moreover the sector s own stake in being clean and being so regarded by others should be acknowledged thus making them an indispensable partner in drawing up such policies For the same reason self regulation should be considered
